

Marttiini

CATALOGO 2023

Puukko, the Nordic knife, has traditionally been the most important survival tool in the harsh Arctic environment. It was the one go-to tool everyone carried and it was used for making firewood and kindling, for hunting and fishing, for cleaning the catch – be it fish or game – for cooking and eating, and at the most extreme situations, the knife could be used to defend oneself from the dangers nature had.

No one left home without a knife and everybody learned how to efficiently use one already at young age. There were – and still are – different knives for different users, all matched to the needs and capabilities of the user. And for festive occasions there were decorated knives that could be used as functional accessories for the clothing.

The Marttiini story began in 1928 at the land of dark Arctic winters and the summer midnight sun, when blacksmith Janne Marttiini decided to establish a knife factory to Rovaniemi in Finnish Lapland.

With the user in mind, he began to create beautiful, high quality knives to be used in the harshest conditions imaginable – knives for people that used them every day and whose life could even depend on the knife.

But don't let the knife's beauty fool you. The moment you put one to a test, you'll be convinced it is the perfect tool for your need. You feel the sensation of natural materials like leather, curly birch, reindeer antler, and of course the ultra sharp blade always made from finest steel.

Today Marttiini knives are a combination of generations of craftsmanship heritage and modern technology that create knives that are not only sharp, but also perfectly represent the beauty and toughness of the North. They're called "puukko" – the Nordic knife.

AAPA

The bold Aapa knife embodies the harsh atmosphere of the Finnish swamp landscape. The model combines the typical characteristics of two strong traditional knives: the blade of a classic Lapp knife and the handle of a Lynx knife. The blade is made of forged carbon steel. The handle is an earthy mix of curly birch waxed in a tar tone and reindeer antler bone. The new sheath type has a wider holster.

FEATURES

- Blade length: 11 cm
- Overall length: 23 cm
- Weight: 176 g
- Blade: Carbon steel 80CrV2, HRC 59.5
- Handle: colour-waxed curly birch, reindeer antler bone, protective oil
- Sheath: leather, black

TUNDRA CB

The Tundra is a full-blooded bushcraft all-round knife for the demanding user. This bushcraft knife is designed for heavy-duty use. Made of high-strength stainless steel, the full tang structure and robust blade provide excellent durability. The blade and the full tang are 3.5 mm thick. On this knife, traditional materials go hand in hand with modern design. The handle is made of Finnish curly birch. The red details on the handle and leather sheath seal the dynamic look. The Tundra knife is available with two handle options: deadwood-like, gray-waxed curly birch (Tundra GR) and natural-colored, waxed curly birch (Tundra CB). The surface of the waxed wood and the design of the handle ensure a firm grip. The sturdy leather sheath is reinforced with rivets. If needed, the knife handle parts can be re-tightened. The screw has a Torx T10 head.

FEATURES

- Blade length: 11 cm
- Overall length: 22 cm
- Blade: Stainless steel

CONDOR TIMBERJACK

The blade of the Timberjack is made of carbon steel, which is perfect for carving, and is easy to resharpen when required. Remember to take proper care of your carbon steel knife. Always dry the blade carefully after each use and oil the blade with unsalted oil on a regular basis. This will ensure your knife will serve you loyally from one year to the next. The textured rubber handle and the finger guard ensure a safe and firm grip of the knife in the most demanding conditions. This knife is supplied with a practical plastic sheath.

DIAMOND SHARPENER “PEN”

A diamond sharpener pen is perfect for the sharpening of Marttiini kitchen knives and filleting knives. With the diamond coated sharpener you can sharpen harder blade materials such as stainless chrome steel. This sharpener design is especially suitable for filleting knives and kitchen knives, but it is also used for ice augers, skinning knives and gutting hooks. The sharpener also includes a sharpening groove for hooks.

FEATURES

- Sharpener length: 8 cm
- Overall length: 20 cm
- Handle: Steel
- Sharpener: steel alloy, diamond granulation
