Dear Business Partner,

Our Bavarian home has always been of great importance to us. For this reason we have retained our headquarters in Kirchanschöring, in the wonderful region of Chiemgau, for over 300 years. This will remain the case, even as we look to the future. For this reason, we are investing in the future: we are building a new, highly modern, logistics centre, in order to be thoroughly prepared for the future. With this we hope to send out a clear message, to further strengthen our European production locations and to provide our customers with an even faster service. As a responsible, family-run business, we have always best combined tradition and modernity.

This is also reflected in our models. Our products stand for high quality and innovation. We have often been praised for this by many prestigious institutions and journals, which we will continue to strive for in the future. Such recognition makes us extremely proud and simultaneously drives us to develop even more new and innovative products.

One of our products is Meindl Identity®. What's special about the Identity® model is the detailed proof of origin on the leather we use for the uppers. We have therefore expanded our product range in this sector for summer 2014. The combining of Identity® with Comfort fit® is completely new.

For the new summer season, we have also developed many more, new, technically innovative models with many sophisticated features, with which our customers will be perfectly equipped for any mountain tour, hike or even stroll through the city. We've extended our extremely successful Alpine series for summer 2014 with some innovative new models. We rely, among other things, on the support and experience of well-known mountain guide Peter Geyer and his competent team in this area.

We look forward to cooperating with you and wish you lots of success!

Your Meindl family

Lars and Lukas Meindl

TRADITIONALLY MADE – INHERENTLY SUSTAINABLE

SOCIAL ISSUES

We gain energy and vitality from our location in Kirchanschöring, which is embedded in a wonderful landscape and a sound environment. This is reflected in the high quality, functionality and durability of our shoes and boots. Here in our home this social responsibility is a part of life. Fair wages, sound working conditions, secure jobs, and trust in the employer motivate us and our colleagues to create innovative products at a fair price. We convey this social, Bavarian way of life to our

partners worldwide, but also reflect on this ourselves as we seek to try and improve the social weaknesses in our region. The Alfons Meindl Social Foundation has set itself the objective of helping those disadvantaged and those in need in our home area, as well as in the districts Traunstein and Berchtesgaden Land. With development projects in Africa and Central America, we are also seeking to make our contribution within the scope of worldwide social activities.

LOCATION

The production of shoes and boots with a sense of value and attention to detail has been the passion of the

Meindl family in Kirchanschöring for over 300 years. We are investing in our home here in the Chiemgau region, a location with the ideal infrastructure. As one of the biggest employers in the region, we believe we hold a sustainable responsibility. An awareness for the nature and the people that live in this area, means securing jobs, optimising processes and enabling efficient resource management. We will enhance our headquarters, including our own production, with the erection of a new logistics centre, equipped with the most cutting-edge technology. Innovatively streamlined logistics allow us to respond to customers wishes on a more individual basis and in a more flexible manner, as well as enabling us to improve our service. In this same way, material logistics are made more efficient, which contributes to CO₂ reduction. In order to maintain environmentally-friendly production, a production-waste air purification system was put into operation in 2012. This keeps CO₂ emissions from manufacturing at a minimum.

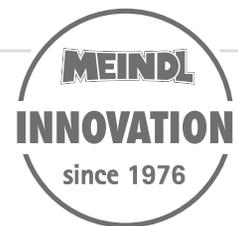

ECOLOGY

We are convinced that only those who live in harmony with others and with nature have a future. Due to tradition, this has always existed in our south-east Bavarian way of life without any great discussion. We convey this through our products and trade. It is an objective of ours to keep the environmental influences of our activities as low as possible. We take our responsibility as environmentally-friendly neighbour in one of the most beautiful landscapes in the foothills of the Alps,

very seriously, as well as the preservation of resources for future generations due to our sustainability responsibility. Meindl follows the principles of reduction, re-use, repair and recycling, in order to keep any environmental impacts as low as possible. Our staff are dedicated to working together to increase our energy efficiency, to reduce our waste, reduce pollution to the environment, to re-use materials and to recycle waste products of production.

TYPES OF USE

For a better overview of the types of use for our boots, we have created six usage classifications. These differentiate the various boot requirements. This system was developed by Alfons Meindl in 1976.

The boot for low level walking – for those who want sturdy and fashionable Meindl shoes and boots for leisure and everyday wear.

Introductory boot for walking and trekking – on high alpine pastures, in low mountain ranges and on maintained paths.

The trekking "classic" – for lengthy walks and comfortable hikes in a gentle alpine landscape.

Trekking boot for ambitious trekking – in low alpine ranges and on fixed rope routes (light irons possible).

The alpine boot – particularly stable for alpine trekking in rocky landscapes, on rock faces, scree and glaciers; suitable for use with crampons.

The ultimate alpine boot – completely reliable for extreme use in critical landscapes, totally robust for use with crampons.

- THE ORIGINAL FROM KIRCHANSCHÖRING

With Meindl Identity®, we revolutionise the market once again. In 2011, we were the first shoe company worldwide to implement the concept Identity® – with this we really hit the mark. Purchasers of the Identity® models gain detailed proof of origin on the used leather upper – and it doesn't just come from any place. For Meindl Identity®, we work exclusively with raw materials, sourced from the region – for which we have all the evidence.

A lot of effort is required to implement Meindl Identity®. Each and every skin has to be documented and marked. Over 200 individual steps are necessary in the production alone, until the finished boot is ready.

We further developed our Identity® line with models from our successful Comfortfit® line: Positano Lady Identity and Positano Identity.

Take a look at our homepage www.identity-leder.de and test the process with the test number: 83417. You can find the Identity® numbers stamped on the inner part of the boot cuff. You can also find further information on our website about Meindl Identity® – The original!

ADAPTS PERFECTLY TO THE FOOT

Thanks to the Meindl Memory Foam system, boots fit to feet perfectly. A specially-developed combination of foams is used to pad the upper. Once warmed by body heat, the foam changes shape to exactly match the shape of the foot. This is supported

by the new alignment of the cuff. With these boots there is no more pinching or pressure-guaranteed. This is the highest level of comfort!

THE MFS PRINCIPLE

The MFS foam in the upper and the SOFT PRINT foam in the footbed adapt perfectly to the shape of the foot due to body heat and/or pressure.

SYSTEMATIC FIT

The fit and adjustment are the outstanding features of the MFS Vakuu® trekking boot line. Materials, technology and workmanship are in perfect harmony. Particularly impressive here is the seamlessly constructed GORE-TEX® lining at the heel. The result

is an unforgettable feeling - for this reason Meindl has enlarged this line for summer 2014. The Vakuu 2.6 GTX® impresses thanks to its new sole tread, which adapts perfectly to the terrain, ensuring more grip.

MFS VAKUUM® SYSTEM

- 
SPECIAL FOAM PADDING
Soft reticulated cuff pads.
- 
MFS VAKUUM® FOAM
Adapts exactly and without pressure to any shape of foot in the ankle, cuff and tongue areas. Extends to the ball of the foot. The foot is enclosed snugly yet softly.
- 
RETICULATED FOAM
Reaching as far as the toe area, the foam guarantees a perfect fit.

QUALITY SHOEMAKING CRAFTSMANSHIP

For generations, we have maintained the skilled art of double stitching out of principle. This tradition actually requires masterly skills that today only few people possess. These boots are

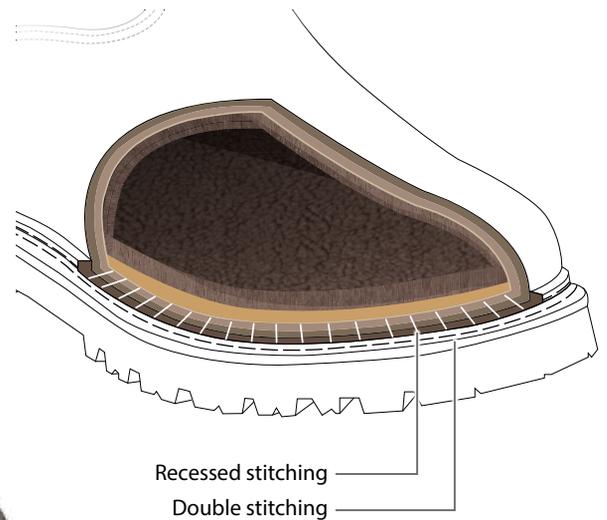

characterised by particularly high quality and durability. A typical feature of double stitching is the visible double seam on the edge of the boot.

Our trademark is the coat of arms of the Federal Guild Association of German Craftsmanship issued in 1370 by Charles IV, Holy Roman Emperor.

- Sil-Juchten leather
- Made from one piece of leather
- Padded tongue inside
- Soft leather lining

FOR THOSE STRIVING TO REACH THE SUMMIT

The range of movement required in alpine regions is very varied. Our many technically-innovative new models provide the right solution for all requirements.

The great lightness, stability and freedom of movement combined in one boot set our Alpine models apart.

The new Meindl ergonomic-fit technology in the tongue and

cuff of the boot has been a huge improvement due to its flexible adaptability. Another absolute highlight is the newly developed crampon absorption: a large supporting surface without heel overhang. The new models are the outcome of successful cooperation with the mountain guide competence team, under the leadership of Peter Geyer.

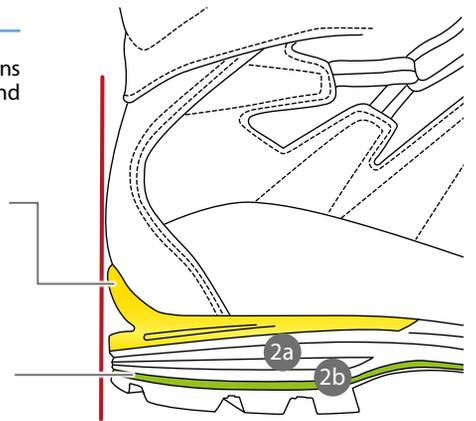

ALPINE-SOLE CONCEPT

The newly developed sole structure with bent heel spoilers shortens the length of the sole at the heel. This enables economical and natural heel strike and roll over while walking.

The bent TPU heel spoiler enables perfect positioning of the heel fastening on all leading crampon models.

Two-part absorption technology:
Light PU wedge throughout (2a) with integrated shock absorber (2b).

Absorption elements incorporated in the heel region facilitate reduced-impact treading while descending.

Courtesy GTX®

With the high-tech functionality of

- Ergonomic-fit technology
- DIGAfix®
- Lacing system that starts at the toes with easy-run loops
- Alpine-sole concept

ERGONOMIC-FIT TECHNOLOGY

The upper is softer and more flexible towards the top, enabling careful walking, climbing and accordingly a safe crampon technique. The soft edge of the upper prevents uncomfortable pressure and sore areas.

Ergonomic-fit technology

The new closed tongue system protects the foot from water and dirt, which together with the lacing system, provides exceptional comfort.

The newly developed and all-round fitted edge of the upper (gater) prevents snow and grit from entering the boot.

-  Stretch material
-  The upper adapts to the natural rolling movement of the foot.
-  DIGAfix® diagonal positioning

YOUNG, LIGHT, TECHNICAL

Walking is a pleasure! Meindl has developed highly functional boots with models from the Light Trekking and Softline® series. The boots all have one thing in common: they are light, stable and softly cushioned - in this way, they are the perfect companions for walking on paths but also on rough terrain. The trendy footwear line Light Trekking enters the new season more modern than ever with its fresh colours.

HEEL CUFF - FREE FLEX

There is an integrated stretch zone in the heel area of the cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

THE REVOLUTION CONTINUES

Thirteen years ago, we brought groundbreaking technology onto the market, which has written its own success story! The models from the Air Revolution® range guarantee an optimal temperature within the boot and improved breathability. This is

also confirmed by numerous awards. There is, therefore, another new model for summer 2014. Even more comfort is guaranteed with the Air Revolution 4.1!

AIR REVOLUTION® STRETCH-TONGUE

The ergonomic-fit technology together with the Air Revolution® system gives exceptional comfort.

-  ERGONOMIC-FIT TECHNOLOGY: stretch material
-  The upper adapts to the natural rolling movement of the foot.
-  DIGAfix® diagonal positioning

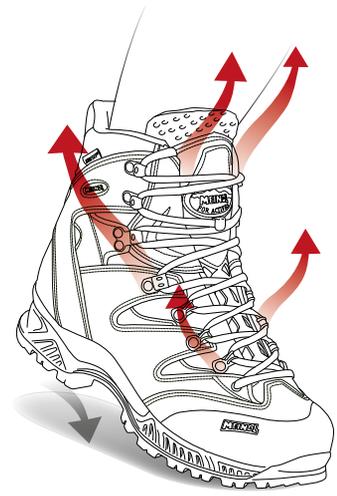

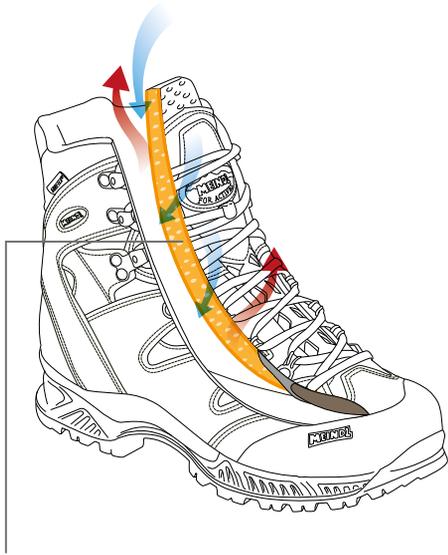

Air Revolution 4.1

SOLE PROFILES

AIR REVOLUTION® SYSTEM

The entire tongue is a combination of 3D mesh and a permanently shock-absorbing, reticulated, perforated sponge. This works like a pump. In order to achieve an anatomical shape, a micro-fleece stabilizer is stitched onto the tongue. To fix it in place, a Velcro tab is used at the front of the boot and at the edge of the tongue.

TREADING PHASE
Fresh air is sucked into the boot.

PUSH-OFF PHASE
Warm air is pressed out of the boot.

THE PERFECT LEISURE PARTNER

Walks, leisure activities or daily routine: The Light Hikers are the perfect partners. All styles in the line are reproduced in a traditionally tweaked way. Meindl also sets a high benchmark in this area - with the Ohio 2. It follows the Ohio, which has been a flagship boot for many years. With the Ohio 2, a more dimensionally stable boot

made of nubuck leather comes onto the market. The removable vegetable-tanned leather footbed is softly padded and extremely comfortable to wear. Fitted with a new Meindl sole, the sole tread has even more grip. The new model is also waterproof thanks to GORE-TEX®.

- Soft and supple leather
- Leather footbed
- EVA shock absorber throughout
- Non-slip rubber tread

Ohio Lady 2 GTX®

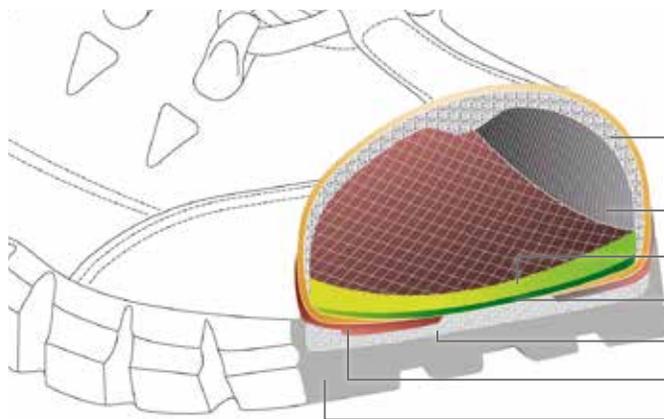

With the high-tech functionality of

SOLE PROFILES

MOUNTED ASSEMBLY

- Foam padding for a perfect fit
- GORE-TEX® lining
- Removable footbed
- Nylon inner sole
- EVA midsole
- Leather upper fastening
- Non-slip rubber tread

The removable footbed made of vegetable-tanned leather ensures the best climatic comfort.

Shock absorber throughout for soft, comfortable treading.

THE **Comfortfit**® BOOT CONCEPT

- More comfort thanks to
- Wide Comfort fit® last
 - Comfort fit® natural cork footbed
 - Extra-soft springy sole

WELLNESS FOR FEET

We use our feet every day - we should therefore seek high-quality models when choosing boots. A special last form provides a broad base and more space for the ball of the foot. The Casual sole is new in this sector for summer 2014. You are perfectly dressed and comfortable 365 days a year with the Treviso! The stable boot is fitted with a cork footbed with integrated memory foam, among other things. This fits the foot perfectly - thanks to a personal footprint you can enjoy the greatest possible comfort the whole day long.

SMALL DIFFERENCE, GREAT EFFECT: THE

Comfortfit® BOOT CONCEPT

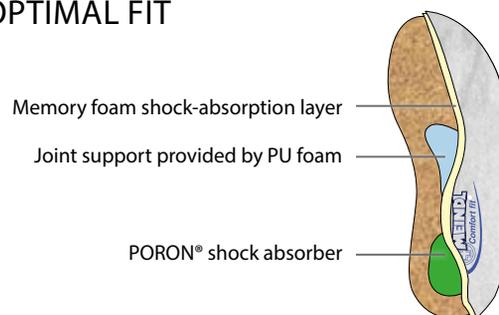

In comparison to a trekking last, our Comfortfit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe.
- 3 Wider stance due to wider sole base.
- 4 Perfect fit due to the snug-fitting heel.

COMFORT FIT® CORK FOOTBED WITH MEMORY FOAM FOR OPTIMAL FIT

- Lightness
As 89% of the fabric consists of gaseous material, the density of cork is extremely low (approx. 480 - 520 kg/m³).
- Elasticity
The unique cell structure enables comfortable walking and standing which increases wellbeing.

GAMES, FUN, EXCITEMENT

Robust, flexible, durable and multi-functional children's boots demand high standards as they have to survive many adventures. We are aware of this responsibility and produce our models with the greatest of care. A great help in finding the right boot size

is our Best-Fit system, developed in 2005. You can quickly find the right boot using the line marked on the footbed. With these boots, every adventure is a pleasure!

- Laces reach right down to the toes providing optimal fit
- Sole tread with EVA soft-tread wedge throughout
- Best-Fit footbed

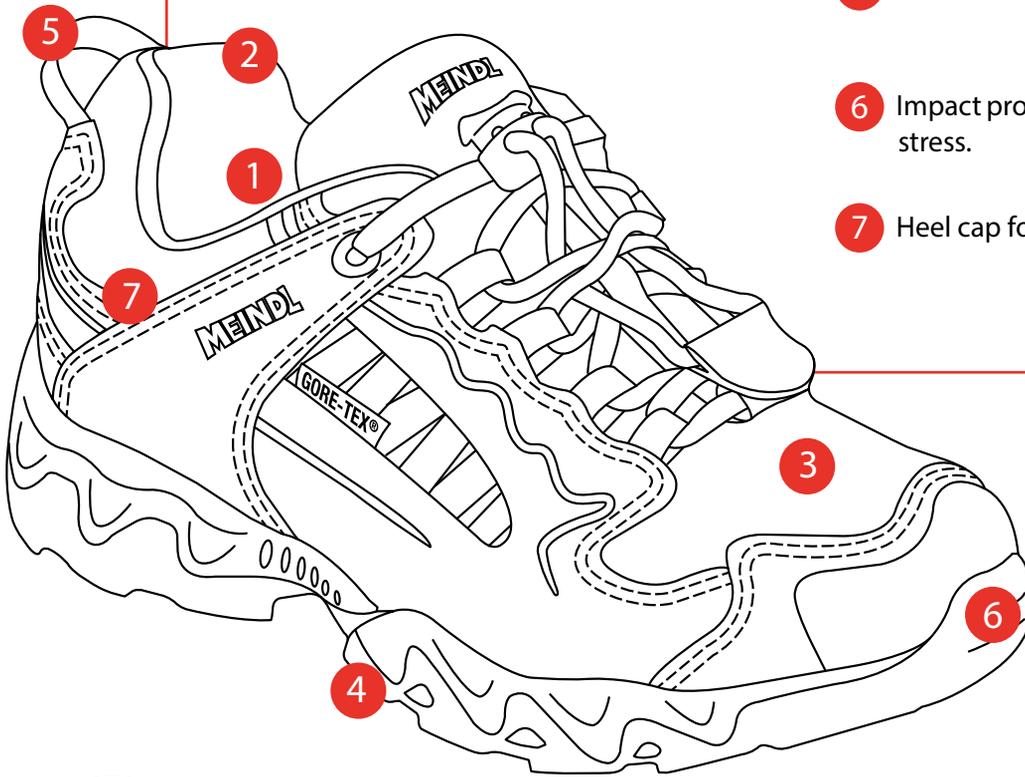

Tofino Junior

SOLE PROFILES

CHILDREN'S SHOES: SEVEN IMPORTANT FACTORS

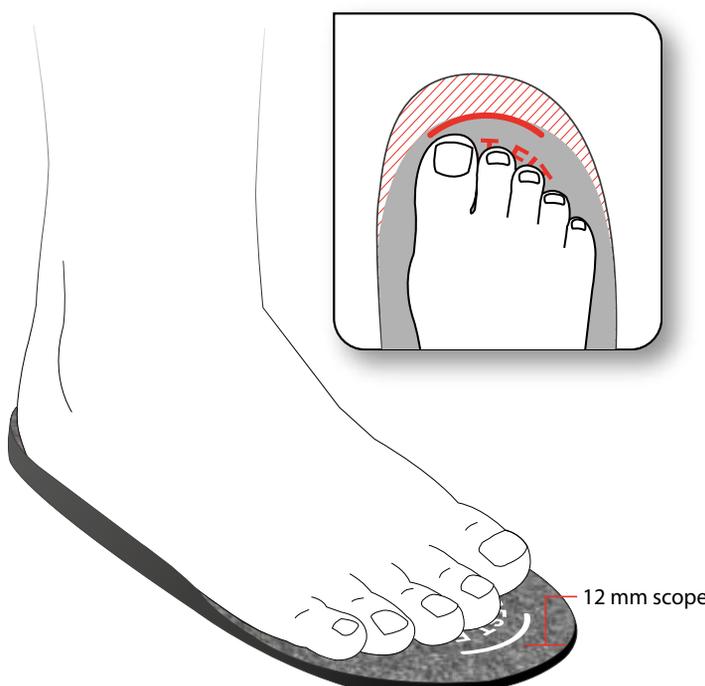

- 1 Removable footbed for optimal fit.
- 2 Softly padded edges for comfortable yet secure hold.
- 3 Special children's last guarantees plenty of space for toes.
- 4 Non-slip sole tread provides stability and security.
- 5 Reflectors increase visibility and security.
- 6 Impact protection withstands even the greatest stress.
- 7 Heel cap for good foot positioning.

BEST-FIT FOOTBED FOR CHILDREN

So that children's feet have enough room. Ideally, a child's boot with a perfect fit will be around 12 mm longer than the child's foot in the toe area. Our removable Best-Fit footbed allows a simple check to be made to assess whether the boot fits correctly.

! INFO:
Children's feet grow up to 1.8 mm per month!

SPORTY, INNOVATIVE AND FASHIONABLE

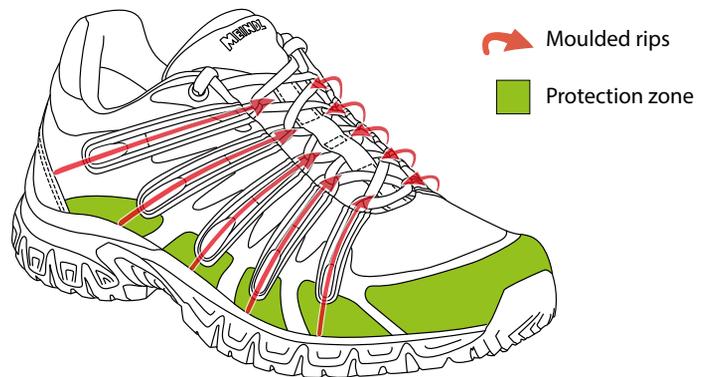

We have a new technical highlight in the Trail Activity Sport sector: the XO 8.0. This model impresses with its high flexibility as well as its perfect stability provided by the protection zone. Within the Speed Hiking boot range, the SX 1.1 GTX® replaces its predecessors. Due to a high proportion of leather, the boot is now

even more robust and of an even higher quality. The new model Palma GTX® impresses with a sophisticated feature: a stretch zone is worked into the tongue for more support. You'll definitely find the right boot for your activities in this range!

EVOLUTION OF THE XO® LINE

Moulded ribs enclose the foot providing it with a high positioning and stability in the boot.

The protection zone provides lateral support and protection.

XO 8.0 Lady

With the high-tech functionality of

SOLE PROFILES

FAST, DEMANDING, INTENSIVE

Speed hiking is an athletic form of hiking - you need the perfect equipment for this challenging sport. Meindl has developed the SX1 GTX® and SX1 Lady GTX® models especially for speed hiking. Optimal stability off-road, the light weight of the boot, and lots of comfort guarantee the greatest possible fun and safety in the mountains.

Firm heel counter that guides the foot perfectly; stabiliser all the way around.

Laces reaching far down the boot to ensure perfect adjustment to the foot and optimal pressure distribution.

Stone shield over the whole surface of the sole

Deep sole tread with distinct heel

Joint support

LIGHT AND TECHNICAL

The most convincing element of all models in the Adventure group are the laces that extend as far as the toe area. In connection with the Variofix® 3 system, a Meindl innovation since 2005, this provides a perfect positioning of the heel and ensures perfect adjustment to the foot.

- Cuff with WAVE system
- Variofix® for better heel positioning

variofix® 3 SYSTEM

variofix®1 variofix®2 variofix®3

A successful system has been further developed: the Variofix® lacing system provides a perfect fit – it has proven itself over many years and has been continually improved. In the heel area, the Variofix® system that runs around the heel provides for a good heel positioning. When lacing up, the free-running "speed wire" is pulled in closely and evenly around the heel. This guarantees better support.

A SHOE THAT DOES EVERYTHING WITH YOU

The Trail Activity range is just right for those looking for the ideal companion for everyday use or easy walking. The technology of this boot is coordinated to suit even the most varied leisure activities. Thanks to the GORE-TEX® membrane, your feet will always remain nice and dry - even in bad weather. Many models

in this range use the reliable Contagrip® sole. The Contagrip® system protects the foot from below and enables, thanks to the flex system, a natural rolling movement of the foot. The non-slip tread on the sole ensures optimal grip and prevents you from slipping. A truly multi-functional boot!

PURE LIFESTYLE

You can really experience things with these shoes - they're the perfect travel companions! The models from the Light Travel range are extremely versatile, comfortable and light - we have everything from a very light model all the way through to a watertight leather shoe: everything is available with GORE-TEX®!

There are also some eye-catchers in terms of colour. These trendy shoes are particularly suitable for walks in the countryside or in the city. But these models can of course also be used to tackle everyday life. The non-slip, but extremely flexible sole provides a perfect footing.

SHOES WITH TRADITION

We have been manufacturing shoes and boots of the highest quality for over 300 years. Only selected materials are processed to produce our brogues, so that the tradition lives on. They are

produced by master craftspeople - our brogues therefore stand for pure shoemaking tradition. For men and women who want, and maintain, a refined costume.

Kössen

- Made by hand
- Soft leather lining
- Vegetable-tanned outsole made of Eichenloh-Grubengerbung leather

THE RIGHT SOCKS FOR YOUR SHOES AND BOOTS

Socks are the closest things to your feet - especially when they're Meindl socks! They have been produced in such a way that they really complement a pair of Meindl shoes or boots. They are redesigned for various types of use and thus each provide

individual benefits. We have individually tailored the system for children and teens, for women and men, for everyday use, for travel, sport and alpine use. Only a sock that really fits makes a boot or shoe perfect.

MEINDL MULTIGRIFF® & MULTIGRIP® - THE ULTIMATE PARTNERS

The Multigriff® sole by Meindl is a product with an intensive developmental history. We gathered, tested and trialled a great deal of practical experience. Academic institutes accompanied our developmental work in order to obtain the maximum practical benefits. We also looked at the "feet" of wild mountain animals. This resulted in a concave cross-section, high grip at the edges, good cushioning properties plus a self-cleaning sole tread with contact surfaces and cleats - with grip and bite on all sides.

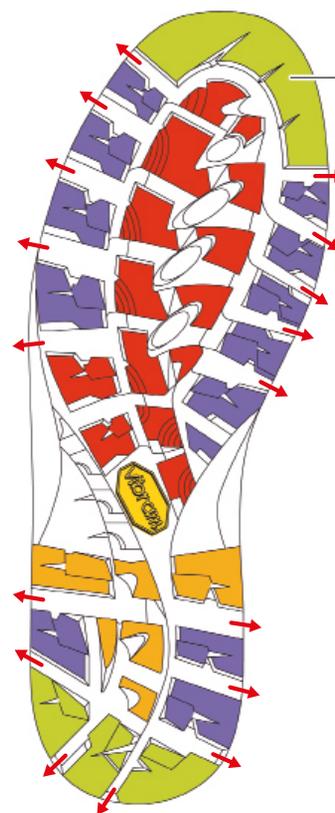

In particular, the sole is characterised by the following:

- The cleat at the front of the heel projects forwards to provide more bite.
- The tread has an open angle so that it self-cleans as the foot rolls over.
- The cleats in the centre make sure that the tread grips in all directions.

MEINDL MULTIGRIFF® BY VIBRAM®

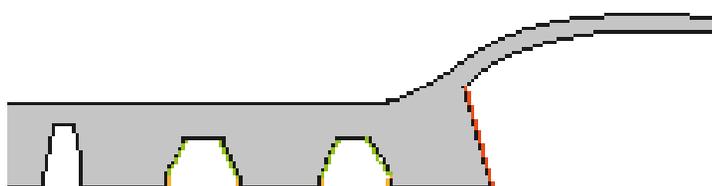

MEINDL MULTIGRIP® BY VIBRAM®

Climbing zone for improved friction and precise stepping on rocks.

- Grip
- Traction
- Braking
- Stability
- Self-cleaning

SIDE VIEW, SOLE HEEL

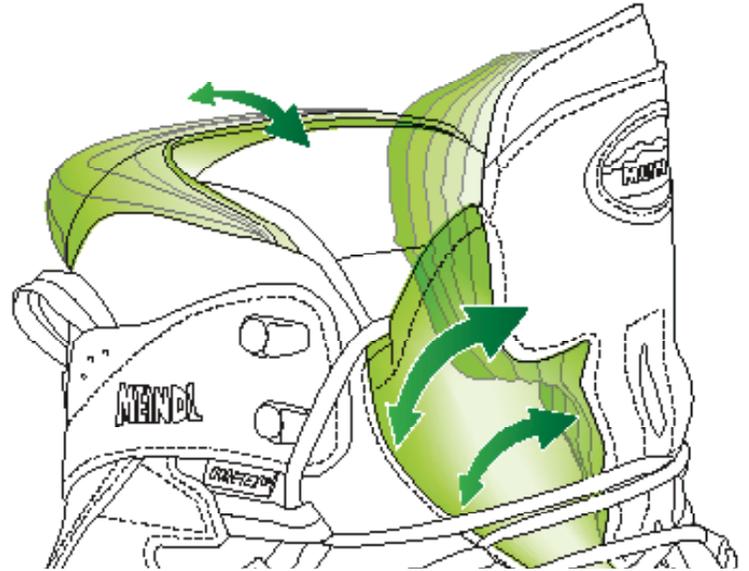

- Self-cleaning
- Bite
- Hook heel, cleats point forwards

The upper is softer and more flexible towards the top, enabling careful walking, climbing and accordingly a safe crampon technique. The soft edge of the upper prevents uncomfortable pressure and sore areas.

Ergonomic-fit technology

The new closed tongue system protects the foot from water and dirt, which together with the lacing system, provides exceptional comfort.

The newly developed and all-round fitted edge of the upper (gater) prevents snow and grit from entering the boot.

MEINDL ALPINE TECHNOLOGY

-  ERGONOMIC-FIT TECHNOLOGY
Stretch material
-  The upper adapts to the natural rolling action of the foot.
-  DIGAfix® diagonal positioning

ALPINE-SOLE CONCEPT

The newly developed sole structure with bent heel spoiler shortens the length of the sole at the heel. This enables economical and natural heel strike and roll over while walking.

The bent TPU heel spoiler enables perfect positioning of the heel fastening on all leading crampon models.

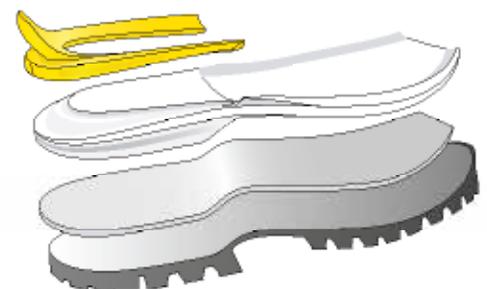

Two-part absorption technology:
Light PU wedge throughout (2a) with integrated shock absorber (2b).

Absorption elements incorporated in the heel region facilitate reduced-impact treading while descending.

ALPINE-SOLE CONCEPT

This sole in its individual elements.
