Grip

Dear Business Partner,

Our boots are made with passion - and we've been doing so for over 300 years! The numerous national and international prizes and awards won by many of our styles are confirmation of our striving for quality and innovation. But in order to be successful in the market, we also focus on many other specifics: Sustainability has always played a large part with us. We place an emphasis on ecology, economy and social issues. We are convinced of the following: Only those who work in harmony with nature have a future. We also want to show this in our boots - and that's why we also consciously focus on regional products such as Meindl Identity. Both customers and retailers were completely won over by Identity in its first year, and that is why we are continuing to expand the range. For each of our Identity styles, we provide a detailed certificate of origin for the leather used in the uppers - once again revolutionizing the market: We were the first company in the world that could put such an extensive project into effect. Meindl Identity is the original!

We are continuing to invest in our site at Kirchanschöring; we want to start on the construction of a new logistics centre in 2012. This is a clear signal to you and our employees: This is

our home! We are thus strengthening our Kirchanschöring production site, and with our new logistics we want to be even better equipped for our work in the future - so that our quality products are with you on time.

Our range of products again has many innovations and new ideas ready for 2013. Our collection includes the completely new Light Trekking range. It's fashionable and cool - and thus a head-turner for summer 2013. We are convinced that this range will be a particular success. It's a technically innovative product for young, dynamic mountaineers.

In the future, we will continue to rely on tradition, quality craftsmanship and a love of detail to manufacture robust, durable, reliable and high quality boots. You can rely on that 100%!

We wish you much success!

The Meindl family

Lars and Lukas Meindl

TRADITIONALLY MADE – NATURALLY SUSTAINABLE

As a traditional family company, we consciously focus on sustainability. Our Bavarian homeland is particularly important to us, because here the traditional and modern worlds are ideally combined. We set great store on Bavarian quality and the Bavarian mindset – and they can develop nowhere better than in one of the most beautiful landscapes of Germany – the Chiemgau. This is where we are based, and in Kirchanschöring we combine environmental awareness and social responsibility

with innovation, development and economic growth. We regard the respectful handling of resources as one of our most important principles, because our life is based on a healthy environment. As a company in the outdoor industry, we regard our commitment here as a duty. Our aim is to continually adapt ourselves and our production to conditions without letting our basic principles fall by the wayside.

ECOLOGY

We have implemented a specific environmental policy for nature protection for decades. Collaboration with the Bavarian Academy for Nature Conservation and Landscape Management (ANL) has been running for over 30 years. For our commitment, we received the Bavarian State Medal for services to the environment and health in 2006. Our boots and shoes are "ÖKO – LOGIC – PRODUCED" – which means less waste, durable products and packaging made from almost 100 percent recycled materials. Concerns for the environment also play a part in shoe production. We use ecologically-safe raw materials and pay attention to recyclability.

ECONOMY

We are a responsible, family-run company – and have been for over 300 years. Efficient resource management is given pride of place. A boot that lives a long time does not have to be produced again as quickly – and that saves energy! We are also happy to look after worn boots and our service department can get them back into shape. What we really enjoy is the many positive responses that we continue to receive from outdoor enthusiasts. If boots could speak, they could certainly tell us a tale. A particularly old style from 1920 was bequeathed to us by its wearer. For us, this boot, which was made by our great-grandfather, is a witness to our quality.

SOCIAL ISSUES

We convey our Bavarian values to the entire world. This is shown, for example, in fair prices for our customers, as well as fair salaries and social working conditions for our employees at all of our production sites. We are committed to society and our fellow humans – and also founded the Alfons Meindl Social Foundation for this reason.

TYPES OF USE

For a better overview of the types of use for our boots, we have created six usage classifications. These differentiate the various boots requirements. This system was developed by Alfons Meindl in 1976.

The shoe for low level walking – who want robust and fashionable Meindl boots and shoes for leisure and everyday wear.

Introductory boot for walking and trekking – on high alpine pastures, in low mountain ranges and on made-up paths.

The trekking "classic" – for lengthy walks and comfortable hikes in a gentle alpine landscape.

Trekking boot for ambitious trekking – in low alpine ranges and on fixed-rope routes (not suitable for crampons)

The Alpine boot – particularly stable for alpine trekking in rocky landscapes, on rock faces, scree and glaciers; suitable for use with crampons.

The ultimate alpine boot – absolutely reliable for extreme use in critical landscapes, absolutely robust for crampons.

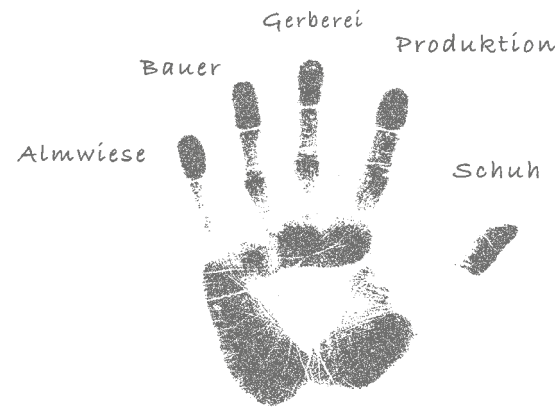

– LEATHER WITH CERTIFICATE OF ORIGIN

A boot with an identity: Meindl has successfully become the first company in the world to provide a detailed certificate of origin for the upper leather used. The effort required for Identity is enormous. Skins from organic farms in Bavaria and Austria are marked individually before tanning so that each individual skin can be traced back to the farmer. In addition to traceability, with Identity great store is also set by transparency. The customer can look forward to a boot whose leather was produced using cutting-edge technology - and above all according to ecological considerations. Even in the tannery, great value is placed on an optimal production process. Added to this are short transport routes and a boot that is made using traditional bootmaking skills.

For summer 2013, Meindl has three new styles in its range. All three have one thing in common: The lining consists of chrome-free lining leather; the boots are particularly soft and smooth.

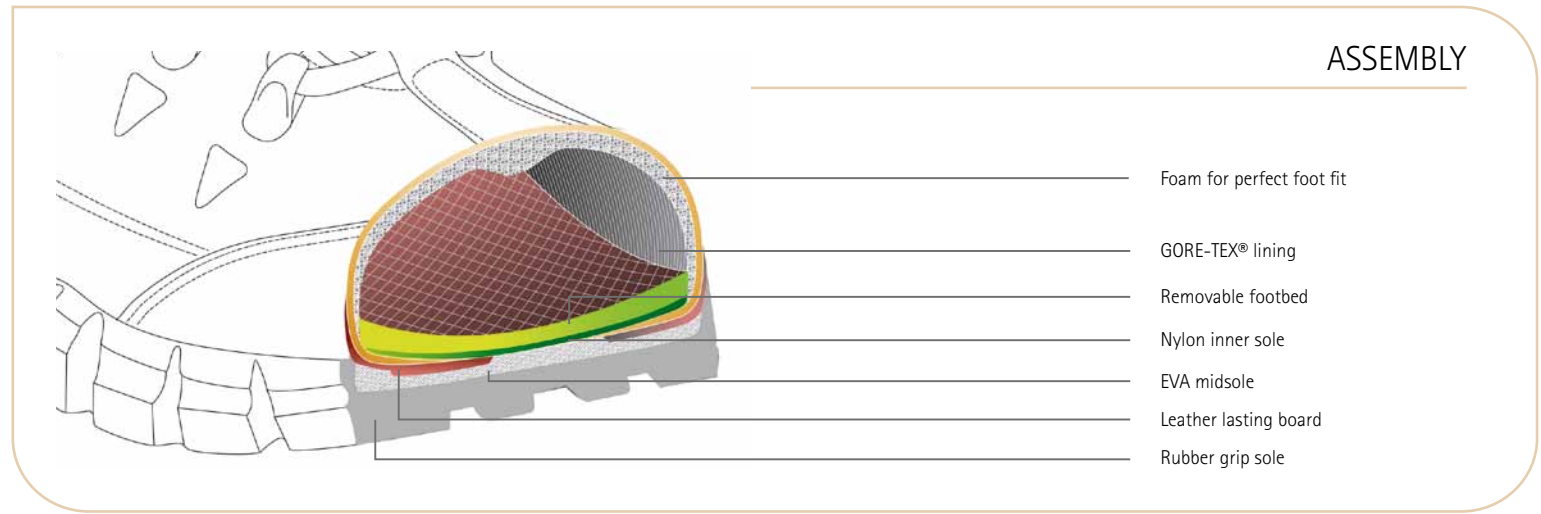

To see Meindl Identity for yourself go to our website www.identity-leder.de. Test the procedure and enter our test number 83417 in the tracker. You can also find out lots of other information there on Identity.

ADAPTS PERFECTLY TO THE FOOT

Thanks to the Meindl Memory Foam System, boots fit 100%. A specially-developed combination of foams is used to pad the upper. Once warmed by the heat of the body, the foam changes shape to exactly match that of the foot. This is supported by the

new alignment of the cuff. With these boots, there is no more pinching or pressure - guaranteed. This is the highest level of comfort!

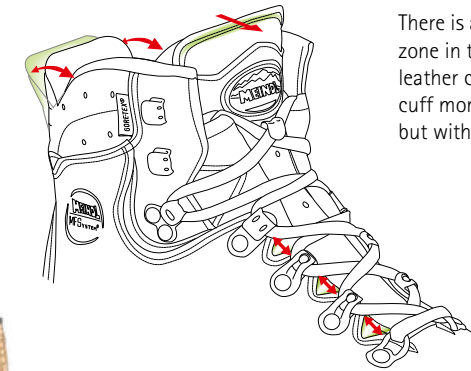

THE MFS PRINCIPLE

The MFS foam in the upper and the Soft Print foam in the footbed adapt perfectly to the shape of the foot through body temperature and/or pressure.

MFS foam

HEELCUFF-FREEFLEX

There is an integrated stretch zone in the heel area of the leather cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

HARD SHELL - SOFT CORE

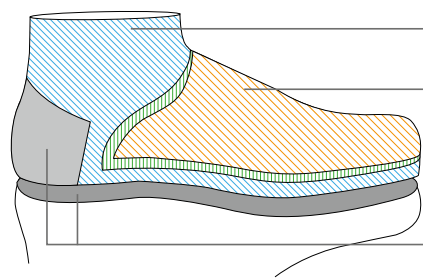

All feet are different - and Meindl has the right answer: The Meindl Fit system is based on three different last shapes. W stands for wide ('weit'), M for medium ('mittel') and S for narrow ('schmal'). The sole surface and the heel are the same in all. This guarantees something for every foot! The style with the medium last corresponds to the current width of the Vakuum Ultra. And there's something else too. In addition to the newly developed width system, the new boots also have a special feature: They have vacuum technology!

Oviedo Lady GTX®

With the high-tech functionality of GORE-TEX

THE MEINDL FIT SYSTEM CONCEPT

LAST

FIT SYSTEM AREA

Lasts vary across the entire forefoot area depending on the Fit System size

SOLE SURFACE AND HEEL

remain the same

THE MEINDL FIT SYSTEM

in three widths corresponds to width

- W Weit (wide) I
- M Mittel (medium) H
- S Schmal (narrow) F

SYSTEMATIC FIT

The fit and adjustment are the outstanding features of the MFS Vakuum line. Materials, technology and finish are in perfect harmony. The result is an unforgettable feeling - and Meindl has further improved this line for summer 2013. The Vakuum 3.0 GTX® has new lacing and sole concepts. These guarantee even more comfort in the mountains!

- VarioFix: Lacing system that pulls the heel into the back of the boot ensuring a secure fit.
- Asymmetric rubber rand that is applied by hand

MFS® VAKUUM SYSTEM

- SPECIAL FOAM PADS
Soft reticulated cuff pads
- MFS® VAKUUM FOAM
Adapts exactly and without pressure to any shape of foot in the ankle, cuff and tongue areas. Extends to the ball of the foot. The foot is enclosed snugly yet softly.
- RETICULATED FOAM
as far as the toe area guarantees a perfect fit.

QUALITY SHOEMAKING CRAFTSMANSHIP

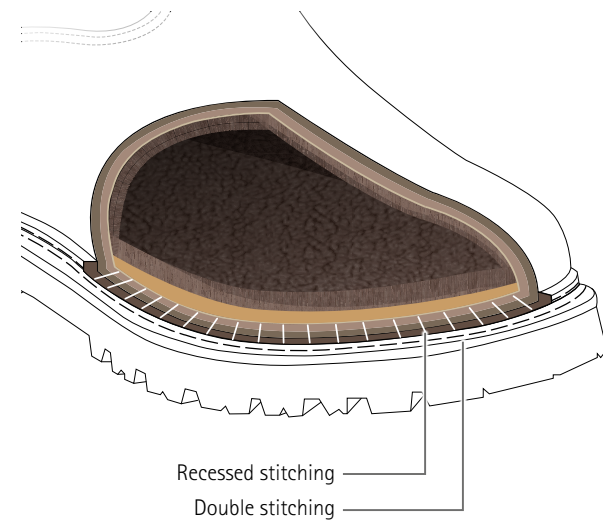

For generations, we have maintained the skilled art of double stitching on principle. This tradition actually requires masterly skills that today only few people possess. These boots are

characterised by particularly high quality and durability. A typical feature of double stitching is the visible double seam on the edge of the boot.

Our trademark is the coat of arms of the Federal Guild Association of German Craftsmanship issued in 1370 by Charles IV, Holy Roman Emperor.

TRUE DOUBLE STITCHING

- Flexzone in the upper for a soft fit
- Soft leather lining
- Air cushion

HIGH MOUNTAIN BOOTS

The range of movement required in the high Alps is very varied. It ranges from hikes in the high Alps, through fixed-rope routes, to walks in ice and snow - we have the right answer to hand for any conditions! For many years, we have held a diverse range of styles, offering everything from light boots for fixed-rope routes, to mountain boots suitable for crampons - everything

the mountaineer's heart desires. Our Alpine boots are extremely light but very stable. They provide security when walking - even on challenging routes. Our Alpine styles are additionally distinct in that they have a flexible upper with optimal stability. The experience of the skilled team around the well-known mountain guide Peter Geyer has also flowed into our Alpine styles.

- Cuff with Wave System
- Digafix
- Lacing system that starts at the toes with easy-run loops
- One-piece, asymmetric rubber strap
- Microfibre material throughout
- Extremely light

YOUNG, COOL, LIGHT

A technical innovation for young and dynamic mountaineers: In its Light Trekking line, Meindl is bringing a truly trendy line in boots onto the market in the summer of 2013. They are light, stable and softly shock-absorbent - and with their fresh colours have a modern look.

HEELCUFF-FREEFLEX

There is an integrated stretch zone in the heel area of the cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

- Extremely light
- Lacing starts at the toes
- Heel spoiler for rigidity

LIGHT BOOTS, GREAT COMFORT

Super-light and comfortable - this is what characterises the Meindl Softline® styles. But they are still very stable with gentle shock absorption, thus providing optimal comfort when worn. We regularly receive a great deal of praise from many long-distance walkers after completing their challenging routes. This is because with these styles they have the right boots and therefore aren't stopped by tough terrain!

INNOVATIVE COMPANIONS

This revolutionary technology was developed by Meindl twelve years ago and has since received several awards. It is characterised by optimal climate control in the boot and by improved breathability - a shoe with air conditioning!

And all of the styles in the series have gone down well - which is impressively underlined by our many awards. Our most recent success: The AirRevolution 2.3 won in a test by ALPIN magazine - and beat some strong competition!

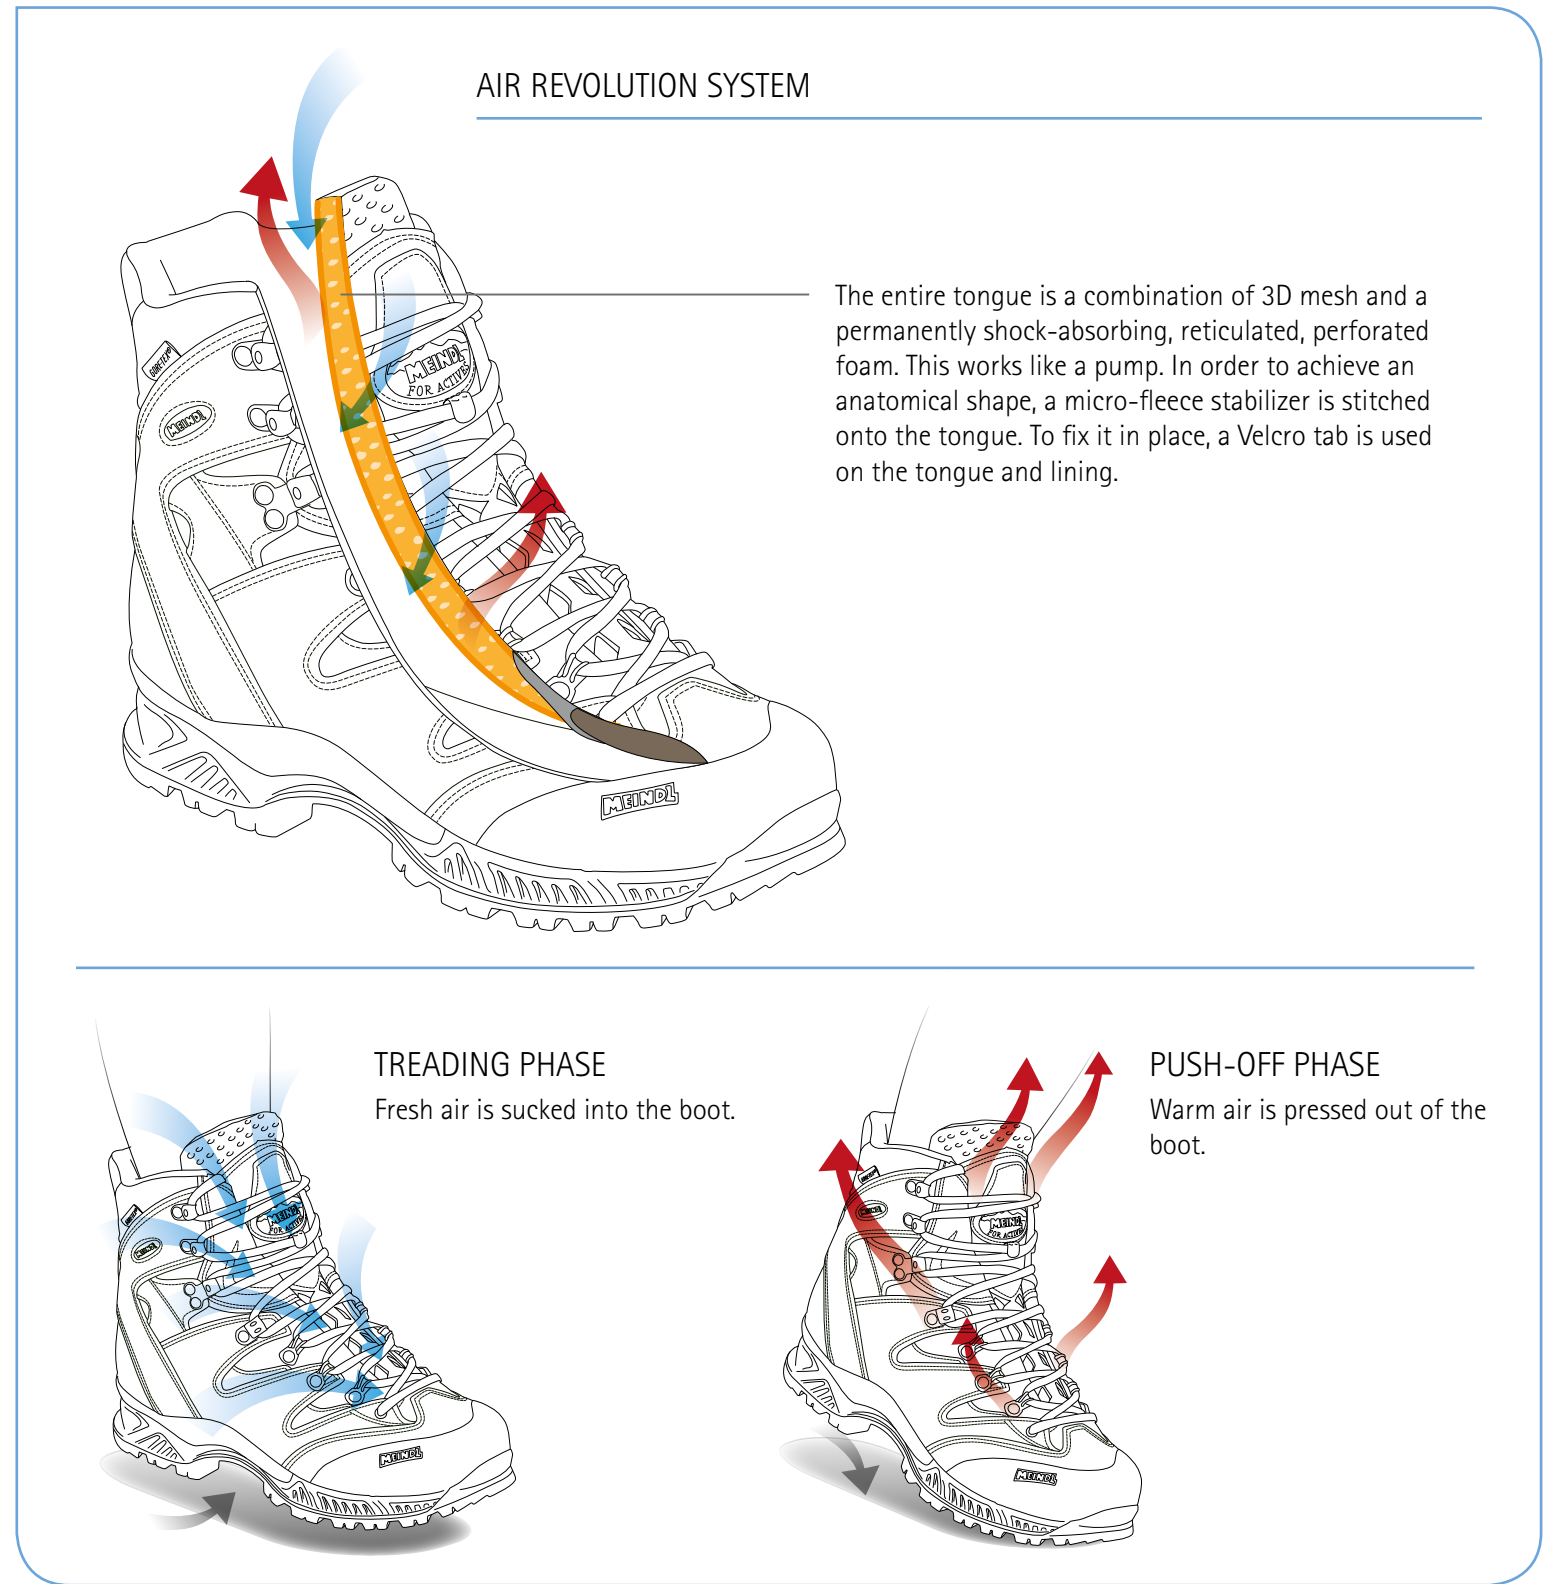

- Heelcuff-Freeflex cuff
- Lacing starts at the toes
- CF SOLE TECHNOLOGY
The carbon TPU frame technology provides increased stability in the heel area, and perfect shock-absorption and roll-off is provided by the special, continuous PU shock-absorber.

THE PERFECT LEISURE PARTNER

A sheer wonder of nature for those who love to be on the move! Light Hikers are the perfect partners for enjoyable walks and leisure activities, but these styles are also ideal for everyday wear. Light Hikers have a grippy sole yet are soft and comfortable. All styles in the range are produced using traditional lasting. This means that the boot and shoe's sole is still applied using true

shoemaker's skill and the upper is assembled on the last. This choice of material is one of the guarantees of success for this range. Lasting is not only a characteristic of quality but also a guarantee of fit and comfort, because the entire boot or shoe shape retains significantly more stability.

- Glove-soft leather cuff
- Leather footbed
- Continuous EVA shock-absorber
- Grippy rubber sole

COMFORTABLE AND SPORTY

When travelling, working, driving and even when sleeping, we set increasing store by comfort - and we should take it into consideration when standing and walking! Meindl recognised this trend years ago and has the right answer ready in its Comfortfit® range. A specially shaped last provides a broad footing; a spacious toe box and a narrower heel guarantee a perfect fit with superb comfort. The soft, shock-absorbing footbed makes walking a pleasant experience.

- Cork footbed
- Leather lining
- Continuous EVA soft-step wedge down to the tip of the sole

Toskana

SOLE PROFILES

SMALL DIFFERENCE, GREAT EFFECT: THE Comfortfit® LAST CONCEPT

Compared to a trekking last, this Comfort-fit® last has a more distinct roll. Resistance is lower and the roll-off is easier.

- 1 The area around the ball of the foot is more widely moulded
- 2 The big toe is in a straight position to rule out pressure on the ball of the foot
- 3 • Broad base (footing)
• More volume

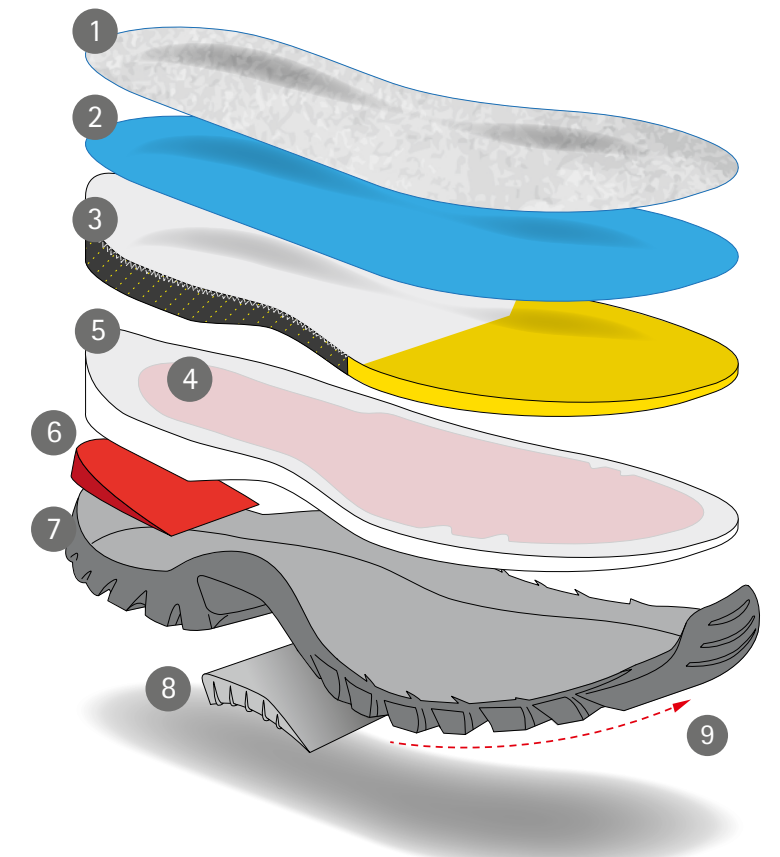

Comfortfit® THE WELLNESS SPORT SOLE CONCEPT

This highly developed sport sole provides an optimal grip on any surface.

- 1 - 3 Footbed
- 4 - 8 Sole

- 1 Fleece
- 2 Continuous EVA shock-absorbing foam
- 3 EVA heel cup with Memory Foam
- 4 Nylon insert for torsion stability
- 5 Continuous EVA shock-absorber
- 6 Shock-absorber
- 7 Meindl Multigrip® sole
- 8 TPU wedge, joint stabilisation
- 9 Soft, long roll-off optimizes the sequence of movement

SPORTY AND COMFORTABLE TO REACH THE PEAKS

There's an innovation in the Comfortfit® range for summer 2013: In the Bernina 2 and the Guffert GTX®, we now also have mountain boots with cork footbeds and volume adjustment. In this way, every mountain hike will be a special experience!

Soft leather lining

GTX® lining

Soft foam padding

Comfortfit® cork footbed

- 1 Continuous natural-cork footbed
- 2 Continuous Poron shock absorber for cushioned steps
- 3 Joint support provided by PU foam
- 4 Absorb 3000: Good moisture absorption and high resistance to wear
- 5 Integrated fleece for absorption and wicking of moisture

Removable volume adjustment

THE BENEFITS OF NATURAL CORK: PURE NATURE!

- **Lightness**
As 89% of the fabric consists of gaseous material, the density of cork is extremely low (approx. 480 - 520 kg/m³)
- **Elasticity**
The unique cell structure provides comfortable walking and standing to increase your wellbeing.
- **Behaviour when moist**
Climate regulation through its unique behaviour when moist

- **Warmth**
Cork provides a cosy climate for the boot interior as it adjusts to temperatures.
- **Ecologically sustainable**
Sensible economic use of the cork oak guarantees preservation of cork forests and thus the ecological balance.

WELL EQUIPPED FOR ANY ADVENTURE

Robust, flexible, durable and multi-functional - children's shoes demand high standards as they have to survive many adventures. We are aware of this responsibility and produce our styles with the greatest of care. We want to give children the best possible

equipment. A shoe that does everything with you - every day, in any weather. In this way, every adventure can be enjoyed safely!

- Laces with stoppers
- Heel construction: flexible heel so it can be fold down

Solan Junior GTX®

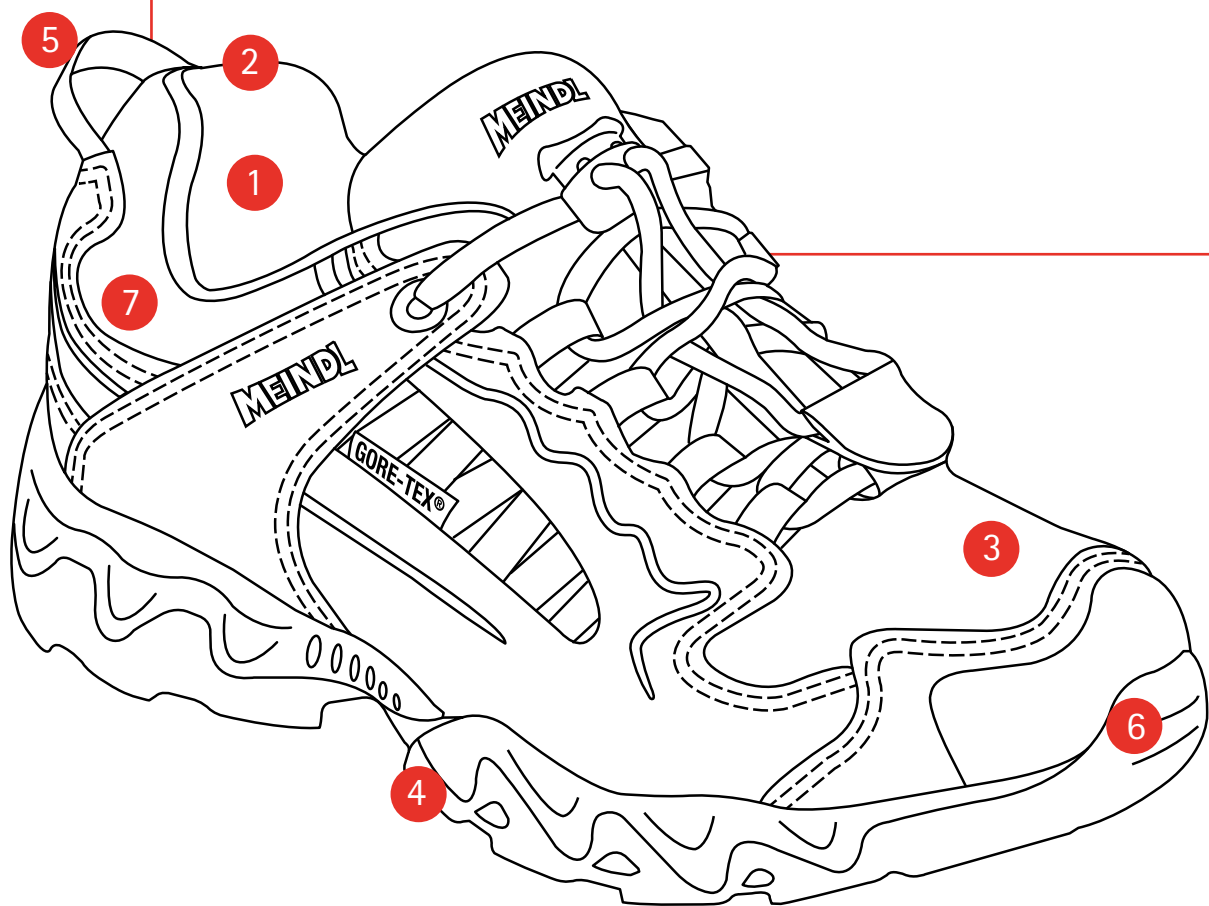

SOLE PROFILES

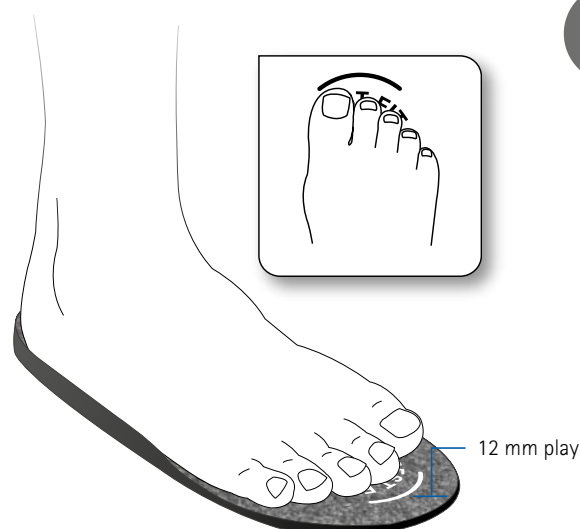

SEVEN POINTS THAT ARE PARTICULARLY IMPORTANT TO US WHEN IT COMES TO CHILDREN'S SHOES:

- 1 Removable footbed for optimal fit
- 2 Soft padded edges for comfortable yet secure hold
- 3 Special children's last guarantees plenty of space for toes
- 4 Grippy sole provides stability and security
- 5 Reflectors increase visibility and security
- 6 Impact protection withstands even the greatest stress
- 7 Heal cap for good foot positioning

BEST FIT FOOTBED FOR CHILDREN

So that children's feet have enough room. Ideally, a child's shoe with a perfect fit will be around 12 mm longer than the child's foot in the toe area. Our removable Best Fit footbed allows a simple check to be made on whether the shoe fits correctly.

MOVING BRISKLY AND BRIGHTLY

Meindl is setting the trend for summer 2013! The new range of Light Travel comes with fresh, summer colours - the new styles are in red, blue, reed and petrol. They are extremely versatile and extra light - and include everything from airy shoes to waterproof

ones with GORE-TEX®. The styles are thus ideal for everyday use, for leisure or for travel. The new soles additionally provide a perfect foothold.

- Comfortable
- Extremely light and flexible
- Very versatile, and they pack down small

AIRY THROUGH THE SUMMER

The Light Trail series is completely new for summer 2013! What makes it special: The upper consists of an airy mesh. The proven Fast Closure System provides perfect support. A new sole concept

has also been implemented in these styles: The sole has an impressively good grip and stone shield protection.

FAST CLOSURE SYSTEM

The easy-run nylon laces can be drawn up with one hand and fixed using the zip clip. The lace can then be stowed safely under the tongue cover. There is no need to lace up the shoes when you have the Fast Closure System.

SOLE GRIP

- Lacing starts at the toes
- Entire upper made from airy mesh
- Impact protection with hand-applied rubber toe cap

FAST, DEMANDING, INTENSIVE

Speed hiking is an athletic form of hiking - and you need the perfect equipment for this challenging sport. Meindl has developed the SX1 GTX® and SX1 Lady GTX® styles specially for

speed hiking. Optimal stability in open country, low weight and lots of comfort guarantee the greatest possible fun and safety in the mountains.

FAST CLOSURE SYSTEM

The easy-run nylon laces can be drawn up with one hand and fixed using the zip clip. The lace can then be stowed safely under the tongue cover. There is no need to lace up the shoes using the Fast Closure System.

SOLE PROFILES

- High-stabilization lacing – very good lacing over the instep through low-set fixing points
- Grippy sole with Stone Shield

PURE ADVENTURE

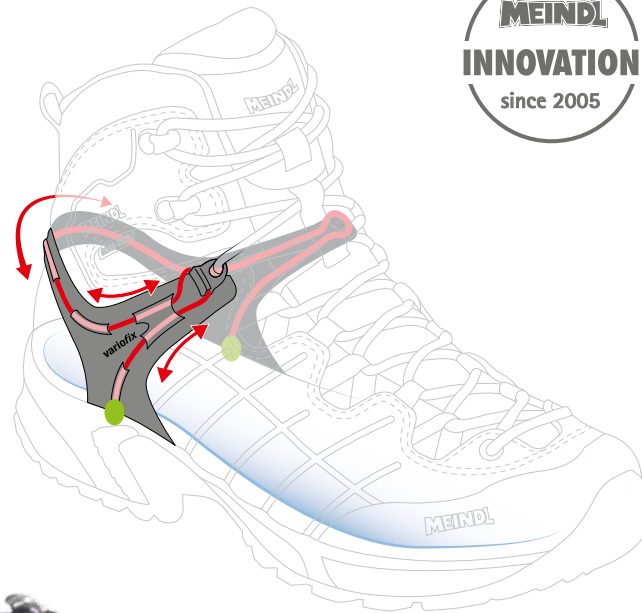

Fashionable, sporty, dynamic: those are the Meindl styles in the Adventure group! These high-quality leisure shoes are really multi-talented. With these shoes, every adventure becomes an experience!

- Cuff with WAVE system
- Variofix® for better fixing over the instep

variofix® 3 SYSTEM

A successful system has been further developed: The Variofix® lacing system provides a perfect fit – and has proven itself over many years and been continually improved. In the heel area, the Variofix® system that runs around the heel provides good heel positioning. When lacing up, the free-running "Speed Wire" is pulled in closely and evenly around the heel. This guarantees better support.

SHOES WITH TRADITION

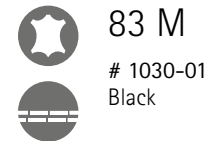

We have been manufacturing shoes of the highest quality for over 300 years. Only selected materials are processed to produce our brogues, so that the tradition lives on. They are produced

by master craftspeople - and our brogues thus stand for pure shoemaking tradition. For men and women who want and maintain a refined costume.

MEINDL MULTIGRIFF® & MULTIGRIP® THE ULTIMATE PARTNERS

The Multigriff sole by Meindl is a product with an intensive developmental history. We gathered, tested and trialed a great deal of practical experience. Academic institutes accompanied our developmental work in order to obtain the maximum practical benefits. We also looked at the "feet" of wild mountain animals. This resulted in a concave cross-section, a high grip at the edges, good cushioning properties plus a self-cleaning profile with contact surfaces and cleats - with a grip and bite on all sides.

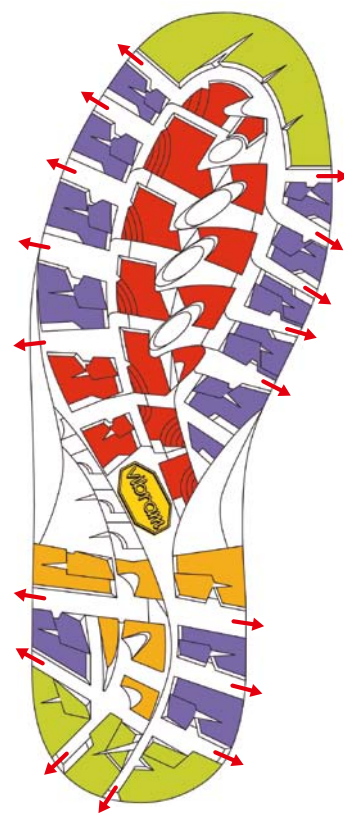

In particular, the sole is characterised by the following:

- The cleat at the front of the heel projects forwards to provide more bite.
- The profile has an open angle so that it self-cleans in the roll-off movement.
- The cleats in the centre provide security that the profile grips in all directions.

THE RIGHT SOCKS FOR YOUR BOOTS AND SHOES

Socks are the closest things to your feet. Particularly when they are Meindl socks. They have been produced in such a way that they provide real benefit to a pair of Meindl boots or shoes. They are designed for various types of use and thus each provide

individual benefits. We have tailored the system individually for children and teens, for women and men, for everyday use, for travel, sport and alpine use. Only a sock that really fits makes a boot or shoe perfect.
