MICROspikes[®]
GHOST

TPR
MICROspikes[®]
GHOST

Dear Kahtoola Retailer,

At Kahtoola, we dig deep when we develop a product, so it's not every season that we get to bring something completely new to the table.

I'm excited to present you with the fruits of our intense, years-long effort to reimagine what MICROspikes® traction can mean. MICROspikes® Ghost, an evolution of our flagship product, represents a breakthrough in what lightweight traction can deliver in terms of performance and durability.

I've been developing and testing traction devices for over 25 years, and closely involved with the development and rigorous field testing of MICROspikes® Ghost. This feels to me like a "Holy Grail" moment in the traction category. The massive reduction in weight, smoother product interface and quieter handling has put a wide smile on my face over many months of testing, and I suspect it will on yours too.

With a new product, we're also excited to enhance our dedication to product longevity. Starting in September 2025, we're doubling our stretch-on traction warranty, extending from 2 years to 4 years! This includes MICROspikes®, MICROspikes® Ghost, EXOspikes™, and NANOspikes®. This change reflects our confidence in our products' durability and commitment to creating long-lasting gear. Not only is this a significant benefit for our customers, but it is also essential for the long-term health of our planet.

One final note: as you may know, Kahtoola created and registered the trademark MICROspikes® throughout the world in 2005. When other products are referred to as MICROspikes®, this can be damaging to our brand and trademark integrity, no matter how it's spelled or capitalized. As valued partners, we ask for your help in educating sales staff and customers, and ensuring that MICROspikes® only refers to genuine Kahtoola MICROspikes® traction. Together, we can ensure a playing field that sets us up for mutual success.

Last but not least, thanks for your continued support of Kahtoola over the years. We appreciate you!

Sincerely,

Danny Giovale

FALL/WINTER 2025 - 2026

kahtoola.com

OUR BUSINESS IS PERSONAL

When Danny created Kahtoola's first prototype—the KTS hiking crampon—more than 25 years ago, he was motivated by its potential to encourage safer, more rewarding adventures. But to share this innovation with the world, Danny needed to start a business, and he had no interest in the status quo.

Danny vowed to create a globally responsible company committed to making the world a better place while empowering people to push themselves further in the outdoors. And, to ensure his business stayed grounded in those principles, everyone working there would have a say in its direction.

Today, Danny's dream is alive and well. Kahtoola is run by 21 associates, with Danny at the helm. It's a place where we all have the opportunity to be heard, and we do our best to build consensus around important decisions.

This isn't always easy, but collectively, we've built a business we're proud to say is shaped by those with a personal stake in the quality of our gear and our customers' adventures.

GIVING BACK DEFINES OUR BOTTOM LINE

Supporting people, communities and the environment has been a cornerstone of our mission since the very beginning. As long as Kahtoola has been in business, we've pledged a minimum of 1% of our revenues to improve quality of life and the sustainability of our planet.

A small business can make a big difference and we strive to ensure we always punch well above our weight. What began as a focus on Indigenous mountain cultures in Tibet and Nepal, has grown with us into expanded support for indigenous cultures worldwide, outdoor communities, and a broader scope of environmental responsibility.

Over the years, we've provided support to countless organizations through our grants. On the next page, you'll find highlights from some of the many extraordinary grant recipients who are making a real difference.

PHILANTHROPY

KAHTOOLA

INDIGENOUS CULTURES

Tolani Lake Enterprises is based in the Navajo Nation in our home state of Arizona. Their mission is to “cultivate healthy, safe, and prosperous communities by strengthening food, water, and economic systems for our native communities, empowering our youth, and promoting Native cultural knowledge.” Kahtoola is proud to support its Sihasin Demonstration Garden, which teaches traditional and modern agricultural techniques to local communities with limited access to fresh food.

COREY MCMULLEN

OUTDOOR COMMUNITY

Kismet Rock Foundation is based in New Hampshire and “nourishes the physical, intellectual and emotional development of urban and rural children throughout New England before they enter their formative years.” This is done through a four-year education in technical rock climbing, where participants have the opportunity to freely develop their potential in a family-like atmosphere.

PRASENJEET YADAV

ENVIRONMENTAL RESPONSIBILITY

Snow Leopard Trust aims to protect this endangered cat in India through community-based conservation projects, using “an improved scientific understanding of snow leopard behavior, needs, habitats and threats.” Kahtoola supports the organization’s efforts to help snow leopards and people coexist by funding predator-proofing for livestock corrals and conservation education for children living near snow leopard habitat.

TAKING NOTHING FOR GRANTED

In the United States, nearly 40% of our lands are public, a privilege few other countries enjoy. But they can't be taken for granted. To thrive and remain accessible, public lands must be deliberately advocated for, protected and maintained, not only as places to play but as important contributors to the fight against climate change and the overall health of our planet.

This is complex work, which is why we believe in going beyond financial donations in our conservation efforts. Recently, we partnered with The Conservation Alliance to push for the designation of the Baaj Nwaavjo l'tah Kukveni - Ancestral Footprints of the Grand Canyon National Monument, and Kahtoola associates have engaged in on-the-ground activism in D.C., including lobbying against uranium mining in the Grand Canyon.

Public lands benefit us all, and we're committed to using our voice and influence as a business to help make them healthier and more accessible, now and for future generations.

CONSERVATION

MICROspikes®

Footwear Traction

G H O S T

SPIRIT OF THE STEEPS

The goal: create a traction product to empower fast and light adventurers on challenging mountainous terrain. It would be aggressive and ultralight, making it effortless to keep it close at hand, in a vest or backpack.

Using MICROspikes® footwear traction as a guide, and armed with the philosophy “less is more,” we accepted the challenge. The result is a phantom-like version of this legendary workhorse that, through insightful material and design changes, is significantly lighter than the original, yet sacrifices none of MICROspikes® footwear traction’s performance.

Following extensive input from, and testing by, associates, athletes and friends, we’ve made the unbelievable a reality. A manifestation of and for the mountains, helping fast and light adventurers move efficiently through the backcountry.

We call it MICROspikes® Ghost.

MICROspikes®

Footwear Traction

G H O S T

UNCHAINED PERFORMANCE

Peak traction performance meets minimal bulk and weight. MICROspikes® Ghost delivers the time-tested capability of original MICROspikes® footwear traction with innovations designed to help adventurers move quickly and quietly, elevating their experience in the mountains.

FEATHERWEIGHT

TAKE A LOAD OFF.

We set out to reduce the weight of stainless steel chains on MICROspikes® traction, without compromising durability. Inspired by innovations from EXOspikes™ and NANOspikes®, a hard-wearing TPU matrix achieves a dramatically lighter design while maintaining exceptional toughness on mixed terrain.

42%*
LIGHTER THAN
MICROspikes®

SINCE 2015

PACKABILITY

GOOD THINGS COME IN SMALL PACKAGES

Our most packable traction device ensures you're ready for mountain travel without sacrificing valuable pack space, so you never have to compromise on preparedness.

DURABILITY

TEST. BREAK. REPEAT.

Lab results aren't enough - it has to endure real-world use. By subjecting prototypes to grueling torture tests on rock, ice and snow, and continually refining designs based on feedback, we've reinforced key stress areas to ensure that MICROspikes® Ghost will withstand unrelenting use.

STRETCH-ON TRACTION

ACCEPT NO COMPROMISE

Winter travel is slippery business, and every adventure has unique traction needs. With the introduction of MICROspikes® Ghost, we've given fast and light travelers the ultralight, packable performance needed to push efficiently and safely in steep mountainous terrain. But that's merely the beginning. From city sidewalks to mixed terrain to expeditions into some of the most inhospitable environments on the planet, our flexible footwear solutions have you covered.

FEATHERLIGHT FREEDOM

Take fast and light travel over steep, icy terrain to the next level with all the performance of our legendary MICROspikes® footwear traction at a whisper of the weight.

CONOR BURKESMITH | NORTH CASCADES, WASHINGTON

MICROspikes®

Footwear Traction

G H O S T

The stories are true. We've taken the fabled performance of MICROspikes® traction and transformed it into a fleet-footed, packable spirit of the steeps. Coming in at just over half the weight of the original, MICROspikes® Ghost replaces steel chains with durable, lightweight TPU and introduces a lighter, high-performance TPR toe harness with increased packability. At the same time, it maintains an aggressive spike length and arrangement demanding outdoor adventurers have come to rely on. MICROspikes® Ghost is ideal for use on lightweight, flexible footwear such as trail runners or hiking shoes.

NEW EXTENDED WARRANTY Starting in Sept. 2025, all Kahtoola traction will come with a 4-year limited warranty.

DESIGN FEATURES

- **Twelve hard-wearing spikes per foot** optimize traction and stability
- **TPU traction matrix** cuts weight and bulk while offering impressive durability
- **Hybrid elastomer harness** combines TPR at the toe and TPE at the back for lightweight, secure fit
- **Articulating rivets** ensure a rock-solid connection and let spikes shed snow by moving independently
- **Patented reinforced eyelets** reinforce key stress points
- **Raised heel tab** for easy on and off
- **Includes tote sack** measuring 6.75 x 6.25 x 0.25 in / 17 x 16 x 0.6 cm

SPIKES

Length: 0.36" / 9mm

Number of spikes per foot: 12

MATERIAL

- **Traction Matrix:** Thermoplastic polyurethane (TPU)
- **Harness:** Thermoplastic elastomer (TPE) and thermoplastic rubber (TPR)
- **Reinforced Eyelets:** Thermoplastic rubber (TPR)

MOUNTAIN UTILITY

Aggressive traction for steep, icy terrain. When challenging conditions call for uncompromising control, this packable workhorse is always on call.

📍 COREY MCMULLEN | WHITE MOUNTAINS, NEW HAMPSHIRE

MICROspikes®

Footwear Traction

Often imitated, never duplicated. Now on its fourth generation, our award-winning MICROspikes® traction has been trusted by adventurers to safely traverse, steep, icy, mountainous terrain for nearly two decades. Twelve stainless steel spikes per foot aggressively dig into frozen surfaces while a chain linkage adds additional traction and packability. Made from stretchy, ultra-durable TPE material, the harness features patented TPR-reinforced eyelets at each connection point for added strength. MICROspikes® traction is ideal for use on robust, flexible footwear such as hiking or winter boots.

NEW EXTENDED WARRANTY Starting in Sept. 2025, all Kahtoola traction will come with a 4-year limited warranty.

DESIGN FEATURES

- **Twelve hard-wearing spikes per foot** optimize traction and stability
- **Stainless steel chains** move independently and prevent snow build up
- **Secure elastomer harness** retains elasticity down to -22°F (-30°C)
- **Patented reinforced eyelets** strengthen key stress points
- **Patent-pending integrated toe bail** for added security while descending
- **Raised heel tab** for easy on and off
- **Includes tote sack** measuring 6.75 x 6.25 x 0.25 in / 17 x 16 x 0.6 cm

SPIKES

Length: 0.4 in / 1 cm
Number of spikes per foot: 12

EXOspikes™

Footwear Traction

Our most versatile traction delivers true cross-terrain performance while hiking or running. Twelve super-tough tungsten carbide spikes per foot easily grip both dry and icy surfaces. As part of our patented flexible TPU traction matrix, the spikes are the first of three levels of traction that adapt to varying conditions and uneven terrain. EXOspikes™ traction is lightweight, packable, and ideal for use on an array of flexible footwear, from light trail runners to waterproof hiking boots.

NEW EXTENDED WARRANTY Starting in Sept. 2025, all Kahtoola traction will come with a 4-year limited warranty.

DESIGN FEATURES

- **Twelve integrated spikes per foot** deliver three layers of traction
- **Spikes are made of tungsten carbide** for extreme wear resistance against any surface
- **Patent-pending TPU traction matrix** is flexible and quickly sheds snow
- **Secure elastomer harness** ensures an optimized fit and retains elasticity down to -22°F (-30°C)
- **Patented reinforced eyelets** strengthen key stress points
- **Patent-pending integrated toe bail** for added security while descending
- **Raised heel tab** for easy on and off

MAXIMUM VERSATILITY

Designed to adapt to changing terrain, this dynamic explorer transitions seamlessly from doorstep to trail: ice, to snow, to roads, to rocks, and beyond.

MARY MCINTYRE | WASATCH RANGE, UTAH

URBAN EXPLORER

Low-profile traction for hard surfaces. Barely noticeable underfoot, this lightweight motivator keeps you moving safely over slippery roads and sidewalks.

📷 COREY MCMULLEN | BURLINGTON, VERMONT

NANOsPikes®

Footwear Traction

Our go-to traction for road running or walking. Purpose-built for use on hard surfaces, NANOsPikes® traction is ultralight, yet tough enough to stand up to abrasion from streets and sidewalks. Concave tungsten carbide spikes deliver instant engagement on ice while an elastomer harness and integrated toe bail ensure a secure, comfortable fit. This extremely low-profile traction is designed to excel on hard surfaces and fits best on modern running footwear.

NEW EXTENDED WARRANTY Starting in Sept. 2025, all Kahtoola traction will come with a 4-year limited warranty.

DESIGN FEATURES

- **Ten spikes per foot** with concave profile and stepped lug design for enhanced grip
- **Low-profile traction plates** disperse impact and center plate ridges increase grip on soft snow
- **Secure elastomer harness** is optimized for running footwear and retains elasticity down to -22°F (-30°C)
- **Patented reinforced eyelets** strengthen key stress points
- **Patent-pending integrated toe bail** provides added security and conforms to varied footwear

HIKING CRAMPONS

ADVENTURE MADE ACCESSIBLE

Not every alpine hike calls for crampons, but when one does, there's simply no substitute. We got our start in the traction business with KTS, the innovative—and first—crampon designed specifically for flexible hiking footwear. Since then, countless adventurers have relied on our durable, time-tested designs to help them answer the call of the mountains and return home safely.

POWERFUL, PACKABLE

Aggressive, highly adjustable traction designed to pack up small, so you're always ready to safely take on the next demanding alpine hike or approach.

📷 COREY MCMULLEN | WHITE MOUNTAINS, NEW HAMPSHIRE

KTS HIKING CRAMPONS

Our most capable and packable crampon. One-inch-long spikes positioned along the edge of the foot tear into ice and snow with ease and provide an extremely stable platform while a folding heel support collapses flat, allowing the entire unit to pack down smaller than any other hiking crampon. KTS features our patented LeafSpring® Flex Bar technology, which moves naturally with the foot and adjusts to fit a wide variety of flexible footwear. Ideal for use in the alpine and on robust flexible footwear such as hiking boots.

All Kahtoola hiking crampons come with a 3-year limited warranty and a lifetime guarantee on our LeafSpring® Flex Bar.

DESIGN FEATURES

- **Ten 1-inch, optimally spaced spikes** grab ice and snow and provide stability
- **Highly customizable** with adjustable straps to dial-in fit
- **Folding heel bail** allows for ultimate packability
- **LeafSpring® Flex Bar** ensures wide range of motion when used with flexible footwear
- **Independent front and rear binding closures** maintain a secure fit as the ankle naturally flexes
- **Lightweight, replaceable snow release skins** prevent snow and ice buildup
- **Hiking crampon tote sack** available

SPIKES

Length: 1 in / 2.5 cm

ULTRA-TOUGH GAITERS

ENDURING VERSATILITY

Adventure is about stepping into the unknown, which means your gear needs to be ready for anything and everything. That's where our ultra-tough gaiters come in. Their versatility gives you the advantage on unpredictable terrain, while their extreme durability will keep them—and you—coming back for more, no matter what lies ahead.

READY TO ROAM

Maximum protection in unforgiving conditions. Rugged, hard-wearing materials seal out snow and water while standing up to sharp terrain and crampon strikes.

📷 COREY MCMULLEN | WHITE MOUNTAINS, NEW HAMPSHIRE

NAVAgaiter® GTX

Our most robust, protective gaiter features a dynamic, breathable GORE-TEX upper to seal out the elements, while an ultra-durable, waterproof ballistic nylon lower stands up to abrasion from rocks and traction strikes. This, combined with our Aegis® rock guard and DuraLink® instep strap (with 1,000-mile warranty), adds up to an exceptionally hard-wearing gaiter designed for heavy use in wet or frozen conditions on robust hiking shoes or boots.

All Kahtoola gaiters come with a 1-year limited warranty and a 1000-mile warranty on the DuraLink® instep strap.

DESIGN FEATURES

- **Aegis® rock guard** defends instep strap connection points against sharp rocks and terrain features
- **DuraLink® instep strap** is adjustable, easily replaceable + carries a 1,000-mile warranty
- **3D performance fit** includes ballistic nylon—our most durable gaiter material
- **Side zipper closure** with locking slider
- **Stitching** is durable and comfortable against bare skin
- **Elasticized drawcord and toggle lock** seal out the elements
- **Lace hook** fastens effortlessly and securely
- **#5 YKK water-resistant AquaGuard® reverse-coil zipper**

FABRIC

- **UPPER:** Three-layer GORE-TEX laminate with 100% recycled polyester face and backer fabric, PFAS-free ePE membrane and CO DWR treatment

ONE FOR ALL

Push your limits and take on any terrain. Our most versatile gaiter is rugged, breathable and designed with the most challenging multisport adventures in mind.

📷 COREY MCMULLEN | WHITE MOUNTAINS, NEW HAMPSHIRE

RENAgaiter®

Our most versatile gaiter uses stretch-woven nylon that's 60% thicker than INSTAgaiter®, and has higher nylon content, enhancing the durability of this extremely breathable material. At the same time, a CO DWR treatment provides an extra layer of moisture defense, while the Aegis® rock guard reinforces and protects critical stitching areas. Designed for multisport adventurers, this adaptable workhorse is ideal for use in rugged terrain with hiking boots or lightweight, low-cut footwear.

All Kahtoola gaiters come with a 1-year limited warranty and a 1000-mile warranty on the DuraLink® instep strap.

DESIGN FEATURES

- **Aegis® rock guard** defends instep strap connection points against sharp rocks and terrain features
- **DuraLink® instep strap** is adjustable, easily replaceable + carries a 1,000-mile warranty
- **3D performance fit** uses a robust stretch-woven nylon with CO DWR treatment
- **Side zipper closure** with automatic locking slider
- **Stitching** is durable and comfortable against bare skin
- **Elasticized drawcord and toggle lock** seal out the elements
- **Lace hook** fastens effortlessly and securely

ULTRA-LIGHT GAITERS

DO MORE WITH LESS

Sometimes you need to travel fast. Sometimes light. Sometimes both. When efficiency is critical or space is at a premium, our ultra-light gaiters have you covered—literally. Their minimalist design enables quick, unrestricted motion, while lightweight, resilient materials keep your shoes free of unwanted intruders. Consider them your silent partners in adventure.

PACKABLE PROTECTION

Outstanding protection in an ultra-light package. Rain and snow are no match for these waterproof, breathable gaiters that pack down small for fast and light adventures.

© COREY MCMULLEN | WHITE MOUNTAINS, NEW HAMPSHIRE

LEVAgaiter® GTX

Waterproof, exceptionally packable gaiters for minimalist adventures. Comfortable three-layer GORE-TEX fabric moves with the foot and ensures breathable protection from rain storms or snow while a highly water-resistant AquaGuard® reverse-coil zipper maintains flexibility and comfort. This versatile, protective gaiter is ideal for use in wet climates when keeping weight low is essential and on waterproof footwear like GORE-TEX hiking shoes or boots.

All Kahtoola gaiters come with a 1-year limited warranty and a 1000-mile warranty on the DuraLink® instep strap.

Height: 13.5 in / 34 cm

LIGHTER, FASTER, FARTHER

Dynamic protection meets all-day comfort. Ideal for minimalists, these low-profile, incredibly breathable gaiters block speed-sapping snow and debris during high-output adventures.

CONNOR BURKESMITH | WASATCH RANGE, UTAH

INSTAgaiter®

Our lightest, most breathable gaiter excels at high-output activities like trail running and hiking. Featuring our 3D performance fit and built with water-resistant, durable, lightweight stretch-woven nylon, INSTAgaiter® hugs your footwear to seal out dirt, debris and light moisture. This ultra-comfortable gaiter is ideal for use in dry to moderately wet conditions and on lightweight, low-cut flexible footwear such as trail running or hiking shoes.

All Kahtoola gaiters come with a 1-year limited warranty and a 1000-mile warranty on the DuraLink® instep strap.

DESIGN FEATURES

- **DuraLink® instep strap** is adjustable, easily replaceable + carries a 1,000-mile warranty
- **3D performance fit** is both comfortable and low profile
- **Side zipper closure** with automatic locking slider
- **Stitching** is durable and comfortable against bare skin
- **Elasticized drawcord and toggle lock** seal out the elements
- **Lace hook** fastens effortlessly and securely
- **#3 YKK Vislon™ zipper**

FABRIC

86% stretch-woven recycled nylon / 14% polyurethane blend with PFAS-free CO DWR treatment

GAITERS

1-year limited warranty and a 1000-mile warranty on the DuraLink® instep strap

INSTAgaiter®

LIGHTER, FASTER, FARTHER

Ideal for minimalists who prioritize lightweight performance and high-output activities, where all-day comfort and breathability are key.

RENAgaiter®

OUR MOST VERSATILE GAITER

Designed for rugged conditions and those who frequently travel through sharp terrain features but still need a high level of breathability.

LEVAgaiter® GTX

MINIMALIST WATERPROOF PROTECTION

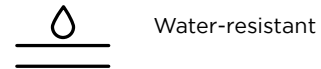

Perfect for fast and light adventures in rainy or snowy environments, where cutting weight and conserving pack space is essential.

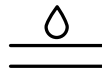

NAVAgaiter® GTX

MAXIMUM PROTECTION IN UNFORGIVING CONDITIONS

Built with maximum durability and waterproof protection, NAVAgaiter® is best suited for rugged, snowy terrain where abrasion resistance is paramount.
