Deerhunter®

DEERHUNTER SINCE 1985

Deerhunter originated from the Engel family's passion for hunting, which spans generations.

Created and produced by Deerhunter the most effective clothing for hunting and outdoor pursuits.

Deerhunter garments are designed by people who put nature first. All materials, functionality and technologies have been carefully selected and rigorously tested to ensure the optimum performance in the field.

Deer-Tex® Membrane

Deer-Tex® membrane lies loosely between the outer fabric and the other layers. All seams are taped, making the product 100% waterproof. The loose membrane is particularly suited to products where there is a major emphasis on being noiseless, for example during stalking and bow hunting.

DEER-TEX®
Membrane

Deer-Tex® Performance Shell

Deer-Tex® Performance Shell membrane is laminated to the rear side of the outer fabric and taped in all seams, making it 100% waterproof. This membrane is exceptionally light, and is therefore used in Deerhunter's more technical products.

DEER-TEX®
Performance Shell

Deer-Tex® Supreme

Deer-Tex® Supreme is a soft lightweight membrane which is only used in Deerhunter's exclusive DXO series. During its production, Deerhunter has placed emphasis on its breathability being on par with its water penetration resistance. Deer-Tex Supreme is therefore a membrane which is ideal for working with wool.

DEER-TEX®
Supreme

Deerhunter® Stormliner®

The Deerhunter Stormliner® membrane is typically laminated to the outer fabric or between two layers of fabric, and is used on products without taped seams. Deerhunter Stormliner® membrane allows a very high level of breathability.

DEERHUNTER®
Stormliner®

Membrane Warranty

Five-year warranty on manufacturing defects in the Deer-Tex® membranes. In the event of claims: Return the product together with this product information label/hangtag and the receipt to your dealer. NB: The Deer-Tex® membrane warranty only covers manufacturing defects. The 5-year warranty applies ONLY to products with Deer-Tex membranes, not the entire series.

Care Instructions

If your hunting apparel incorporates a membrane, it is important that you do not add fabric softener when washing the garment. The membrane ensures that you are kept dry when hunting, and that your skin can breathe. If you use fabric softener, it will clog the pores in the membrane, and significantly reduce the garment's breathability. In order to maintain the permeability of the membrane, it is a good idea if the garment is completely dry before it is packed away, and that you do not store it in a very warm or humid environment.

Dry garment thoroughly before storing.
Do not store in areas of high temperature or humidity.

- Machine washable at 30 degrees
- Do not use softener
- Do not bleach
- Do not iron
- Do not dry clean
- Do not tumble dry
- Line Dry

Reinforcement

If you're stalking your way to your dream buck, or walking across hard terrain, your hunting apparel will be subjected to extra wear and tear. Here, extra reinforcement and durable materials in exposed places are required.

99% Water Proof

Products with Deerhunter Stormliner membrane do not have taped seams – and therefore only 99% waterproof. The membrane is water-resistant, windproof and breathable – and therefore suitable for use in most kinds of challenging weather.

100% Water Proof

Wet and sodden hunting apparel can quickly mar a good hunting expedition. Deerhunter therefore always recommends waterproof products for hunting in rainy weather. A special combination of materials and processes enables us to develop products which are 100% waterproof.

Breathable

No matter in which weather situation you find yourself, choosing Deerhunter's clothing with one of its four membranes, will provide you with a breathable product. This allows you to maintain your comfort while being active and subsequently enjoy your experience more.

Thornproof

When nature challenges us in tough terrain, it demands even more of our hunting apparel. Here, Deerhunter has developed its Thornproof products, which are made from extra strong fabrics with the sole purpose of being able to withstand scrub and thorns.

Two-way stretch

If you require extra freedom of movement and a good fit, choose one of Deerhunter's products with stretch. Using materials with two-way stretch makes the hunting apparel stretchable, which enhances your freedom of movement.

Four-way stretch

When choosing hunting apparel, and you need maximum flexibility and freedom of movement, you should choose one of Deerhunter's products with four-way stretch. Hunting apparel with four-way stretch is elastic both lengthways and widthways, enabling you to move around freely without feeling constricted by your clothing.

Quick Dry

Products treated with quick dry are breathable, and dry faster than other garments. Body moisture is absorbed, and wicked away from the skin so that it evaporates. Consequently, it's easier for you to maintain a stable body temperature and stay dry when hunting.

Azo Free

In order for the hunting apparel to have exactly the right colours, chemical dyes are used. During the dyeing process, the desired colour binds to the fibres in the garment. Colour that has not bound to the fibres is called excess colour. You can remove excess colour and other chemical substances by washing your clothes before use.

Water Repellent

Products impregnated with water repellent treatment are water- and dirt-resistant. Stains are easy to remove. Extremely heat-resistant and has a very smooth surface.

Windproof

If you choose one of Deerhunter's products which have a membrane, it will automatically be windproof. Windproofing is the garment's ability to keep the wind out. If you sit for a long time in a strong breeze, you will quickly appreciate the fact that the garment is windproof.

Taped Seams

Deerhunter's technical hunting products feature taped seams. Taped seams are often used in connection with different types of membrane.

Insulation

If you want to hunt in very cold temperatures, you will benefit greatly from choosing hunting apparel with insulation. Padding or insulation is designed to keep you warm. It is important that you are able to maintain a stable body temperature throughout the day so that you don't freeze.

Wool

Wool is warmer than synthetic fabrics – whether it's wet or dry. Wool wicks moisture much more effectively than cotton, but not quite as well as synthetic fabrics. Wool also takes considerably longer to dry than synthetics.

Lightweight

Lightweight clothing from Deerhunter ensures a comfortable hunting experience and provides extra freedom of movement without adding any extra weight.

Thermal insulation

When hunting in cold temperatures, it is important to choose clothing with insulation. Fabric with thermals skills will keep you warm while wicking away sweat due to the special construction and the air that is capsuled inside the fabric.

Leather

All hunters should own a pair of sturdy leather trousers for hunting! Leather is a very comfortable material, and you can almost walk through anything – they just last. In particular, dog handlers walking through thick vegetation will greatly appreciate wearing leather trousers – in addition to which they are wonderfully warm on cold days.

F. ENGEL

F. ENGEL

Founded in 1927 by Carl J. Engel. F. Engel is one of Denmark's oldest textile companies. Following a visit to the USA, Carl J. Engel got the bright idea of manufacturing Blue Denim workwear, and the company subsequently experienced rapid growth. With the Denim overall which he had brought home from the USA, Carl J. Engel laid the foundation for one of Denmark's first workwear manufacturers.

In 1964, F. Engel made its initial foray into the fashion industry – first with a series of men's trousers under the brand name IN-CA, subsequently adding the Easy Line brand to the company's fashion portfolio. In 1989, F. Engel acquired the Sunwill brand. Carl D. Engel's great passion for hunting led to the creation of the Deerhunter brand in 1985.

Alongside its production of workwear, the company has undergone continual, rapid development – among other things acquiring the workwear brand WorkZone in 1996

In 2009, Deerhunter® was granted a Royal Warrant to supply HM the Queen and the Royal Danish Court.

F. Engel is divided into three well-consolidated, autonomous divisions: Workwear (ENGEL), Menswear (Sunwill) and Hunting & Outdoor (Deerhunter®). There are 150 employees at the company's head office in Denmark, and approx. 400 workers employed at its own factories in Lithuania, where many of the company's products are manufactured.

The company is run by the fourth generation of the Engel family, and thanks to our ability to continually develop the business and our ongoing commitment to quality, the company is stronger than ever.
