Meindl – Quality and tradition

It takes the finest leather and materials and innumerable work steps to produce a shoe . The craftsmanship here is given pride of place, and so, as ever, a human stands behind every machine and moves the work process forward, step by step .

We are thus continuing our centuries-old tradition of craftsmanship, creating styles that give customers a reliable companion for unforgettable moments .

Dear Business Partner,

as a family company, we have been producing boots and shoes for over 300 years. A very long tradition of which both us and our employees are proud of. Every day, we do everything we can to continue this tradition and to keep on developing.

Throughout the history of our company, we have always defined ourselves by the quality, durability, function and fit of our boots and shoes. This has always been, and will remain, our top priority. Especially in today's world, the term sustainability is used often and gladly. In addition to all the legal regulations that we comply with and even often exceed, one of the most important factors for sustainability is the durability and reliability of a product. This creates trust in our boots and shoes. This is something that we are convinced of.

To make our overall collection even more complete and harmonious, again in 2019 we will be presenting you with a number of new products and innovations which will complement our well-known models and technologies. And all of this in the Meindl quality you have come to know.

We would like to wish you a successful season and hope we can continue to look forward to a continuing and pleasant business cooperation.

Lars and Lukas Meindl

The trekking

„classic“ – for lengthy walks and comfortable hikes in a gentle alpine landscape .

The boot for low level walking – for those who want sturdy and fashionable Meindl shoes and boots for leisure and everyday wear .

D

The ultimate alpine boot – completely reliable for extreme use in critical landscapes, totally robust for use with crampons.

C

The alpine boot – particularly stable for alpine trekking in rocky landscapes, on rock faces, scree and glaciers; suitable for use with crampons .

BC

Trekking boot for ambitious trekking – in low alpine ranges and on fixed rope routes (suitable for flexible crampons).

AB

Introductory boot for walking and trekking – on high alpine pastures, in low mountain ranges and on maintained paths .

Types of use

Which boot will fit me perfectly? Which boot should I buy? These are important questions and come up every time you buy a new pair of shoes or boots. Boots with different fields of application are constructed in different ways. The Meindl terrain categories help immediately with which boot works best for each activity and terrain. Already in 1976 Alfons Meindl had developed these categories, which are still universal validity for every purchase of boots.

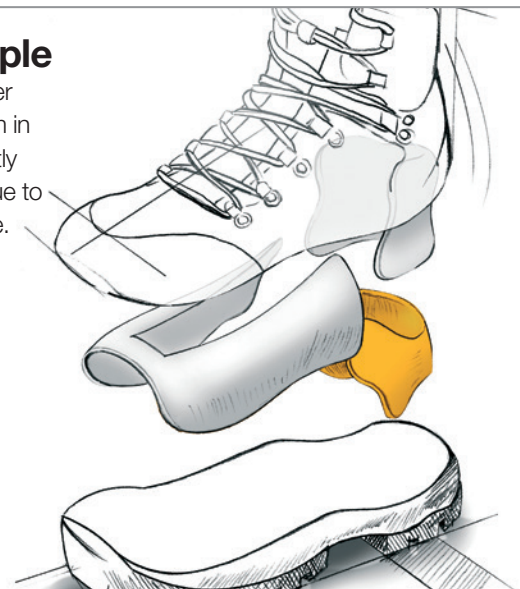

The MFS System

Thanks to the Meindl Memory-Foam System, the boots in this range provide a perfect fit for your feet. By matching different foam types in the ankle and cuff area, the boots can adapt to various foot shapes, once warmed by the body. The boots therefore provide excellent comfort and a perfect fit.

The MFS principle

The MFS foam in the upper and the SOFT PRINT foam in the foot-bed adapt perfectly to the shape of the foot due to body heat and/or pressure.

Sole: Vibram® rubber grip sole Alpin (suitable for crampons)
Size: 6 - 12

A perfect, systematic fit

The fit and adjustment are the outstanding features of MFS Vakuu® technology. The idea behind the MFS Vakuu® styles is to combine a stable outer boot, providing security and purchase, with a particularly soft and adaptable inner boot. Special foam padding which runs all the way to the toe area guarantees a perfect fit. Also particularly impressive is the elasticated GORE-TEX® in the heel area, which means there are no seams at the heel. The AIR-ACTIVE® Vakuu® footbed adapts to the foot, thanks to a combination of foam and fleece, and it imultaneously provides very good support.

Seamless GORE-TEX®
-lining in the heel area

Soft and supple
leather upper

Vakuu Men Bora

EVA soft step wedge

AIR-ACTIVE®
Vakuu®-Footbed

MFS VAKUUM®

The combination of materials makes the difference

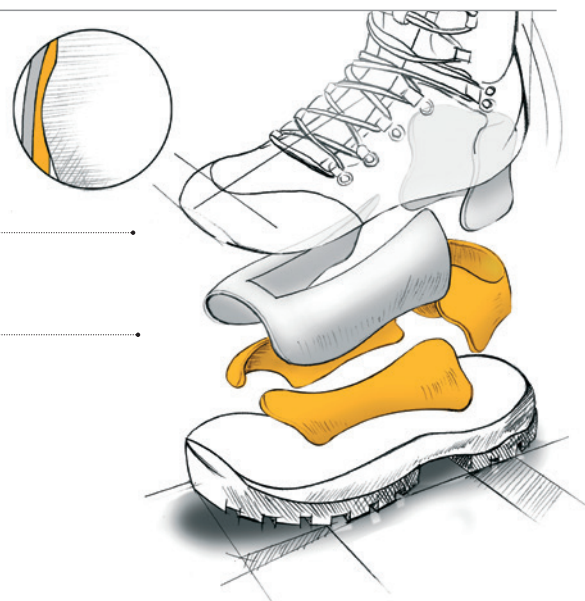

Special foam padding

Soft reticulated cuff pads. Reaching as far as the toe area, the foam guarantees a perfect fit.

MFS Vakuu® foam

Adapts exactly and without pressure to any shape of foot in the ankle, cuff and tongue areas. Extends to the ball of the foot. The foot is enclosed snugly yet softly.

Seamlessly constructed GORE-TEX® lining at the heel

Meindl Multigriff® and Multigrip®

In particular, the sole is characterised by the following:

- The cleat at the front of the heel projects forwards to provide more bite.
- The tread has an open angle so that it self-cleans as you walk.
- The cleats in the centre make sure that the tread grips in all directions.

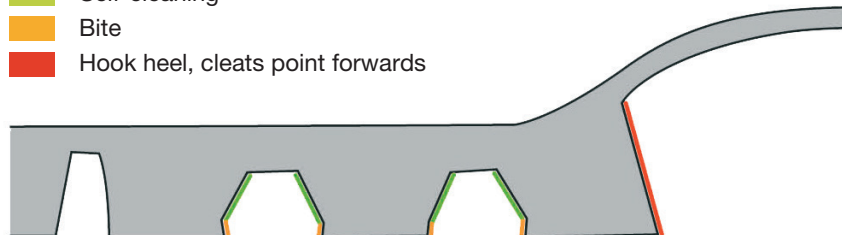

Climbing zone for improved friction and precise stepping on rocks.

Light, stable, technical

The styles in the Light Trekking series are characterised by their stability and light weight. This series covers styles for the widest variety of uses, which are all produced using last-built work-manship. The stable structure provides security and the various soles have excellent grip. The styles fit the foot perfectly, thanks to lacing drawn far forward towards the front of the foot. Some styles are also equipped with the variofix® system, which provides an even better hold for the heel.

variofix® 3-SYSTEM

variofix® 1 variofix® 2 variofix® 3

2005 2008 2012

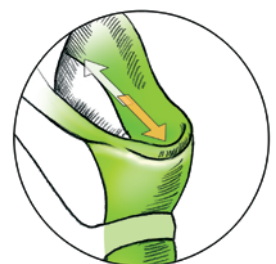

variofix® 3 System

A successful system has been further developed: The Variofix® lacing system provides a perfect fit – and has proven itself over many years and been continually improved. In the heel area, the Variofix® system that runs around the heel provides good heel positioning. When lacing up, the free-running „Speed Wire“ is pulled in closely and evenly around the heel. This guarantees better support.

Heelcuff-Freeflex

There is an integrated stretch zone in the heel area of the cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

High mountain boots

Our Alpine boots are extremely light but very stable and robust and are suitable for different types of crampons. They provide security when walking - even on challenging routes. What makes our Alpine styles even more outstanding is the flexible upper which gives maximum stability. Another highlight is the newly developed crampon heel spoiler which ensures a secure crampon fit without heel overhang.

Innovative climate control

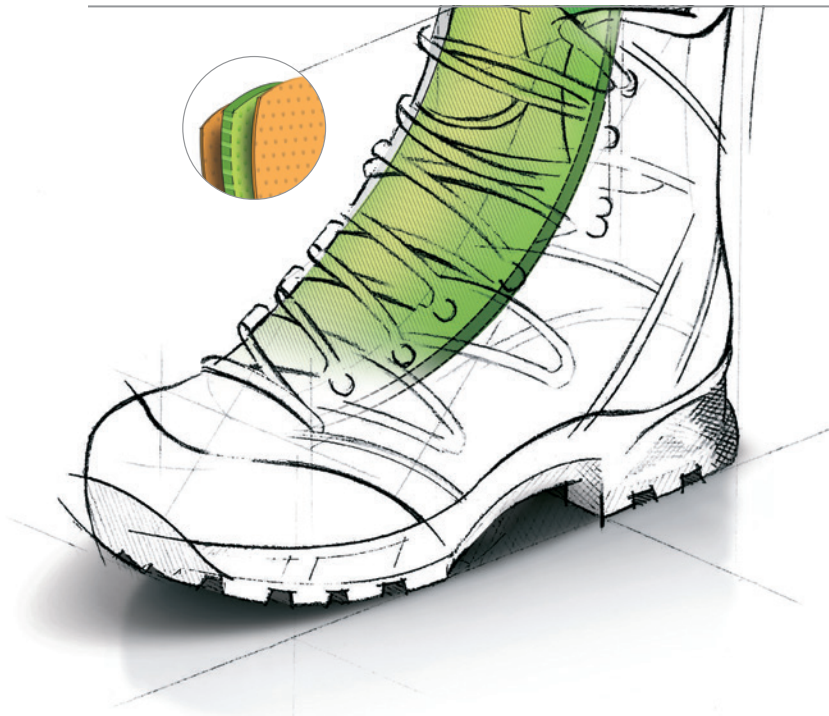

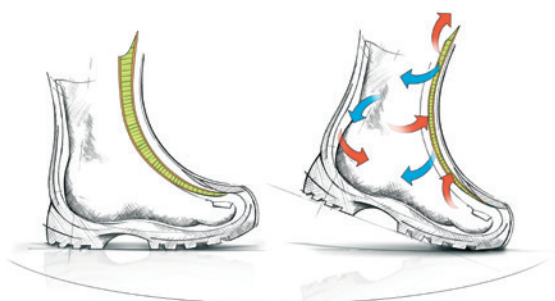

Stability with the best climate comfort! We introduced this pioneering technology for the first time 18 years ago. Since then, the Air Revolution® styles have been winners with their high levels of climate comfort and excellent stability in their respective categories. Thanks to continuous development, the system is still “the” technology for the best climate comfort in alpine and trekking boots.

Air Revolution® Technology

The innovation for optimal climate comfort in boots

The tongue adjacent to the foot is a combination of 3D mesh and a permanently cushioning, reticulated and perforated foam. The Air Revolution® tongue extends beyond the top of the boot and facilitates air circulation. It is simply fixed at certain points on the front of the foot and instep in order to support air circulation.

A tradition of craftsmanship for over 300 years

Soft and supple leather lining

Meindl has manufactured shoes and boots of the highest quality for over 300 years. This conviction is why we maintain the workmanship of double stitching. As high levels of experience and skill are required, only a few boot manufacturers are still proficient in this workmanship. Double-stitched workmanship makes boots particularly stable and durable, and can be recognised by the visible double seam at the edge of the boot.

Our trademark is the coat of arms of the Federal Guild Association of German Craftsmanship issued in 1370 by Charles IV, Holy Roman Emperor.

Wellness for feet

The styles in our Comfort fit® line are characterised by our Comfort fit® concept for uppers combined with a special Comfort fit® footbed. The special wider shape of the upper provides more space in the area of the toes and ball of the foot along with a good heel fit. The Comfort fit® footbed has a layer of Soft Print foam which moulds to the shape of the foot and provides soft cushioning to make walking even more comfortable.

Comfortfit®

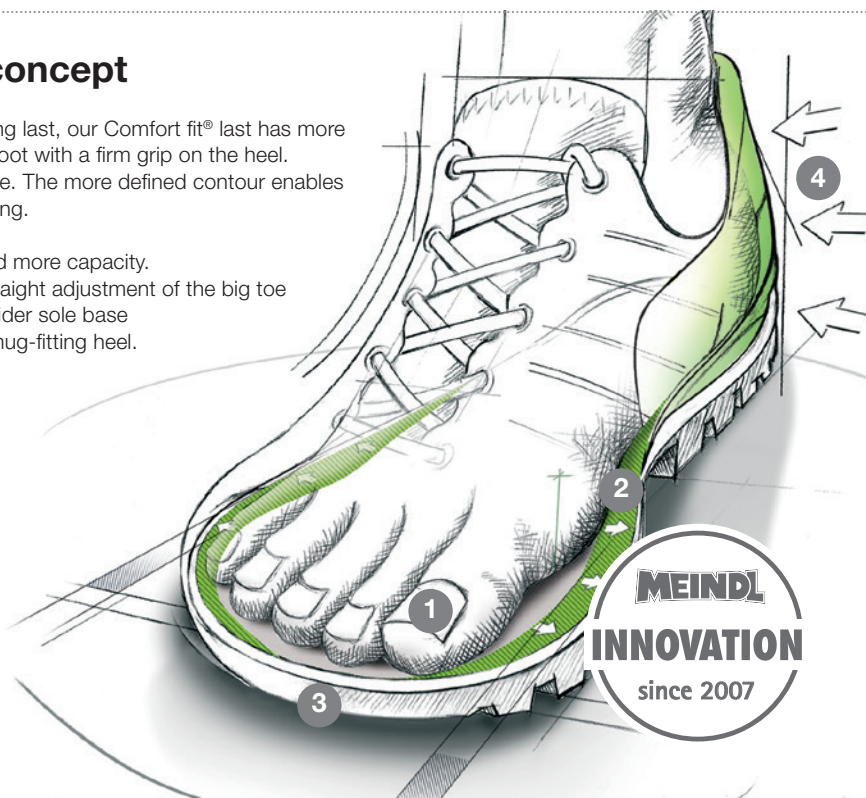

Active Sport Lady GTX®

Comfort fit® concept

In comparison to a trekking last, our Comfort fit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe
- 3 Wider stance due to wider sole base
- 4 Perfect fit due to the snug-fitting heel.

More comfort

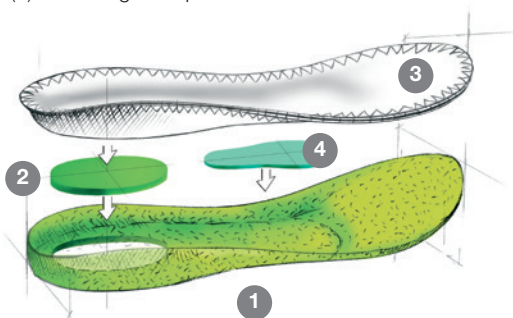

Particularly great demands are placed on our feet every day which is why it is important to have high quality shoes and boots that fit well. The Comfort fit® upper, in combination with the Comfort fit® cork footbed, offers the highest level of foot and climate comfort. As a wider stance for the foot is important the special shape of the Comfort fit® upper means that there's more space in the area of the toes and ball of the foot. The intricately constructed Comfort fit® cork footbed is made of several layers which sit on an anatomically shaped cork footbed. A shock absorber has been integrated into the heel area. The overall comfort is completed by the soft, shock-absorbing sole with a good grip profile.

Comfort fit® cork insole

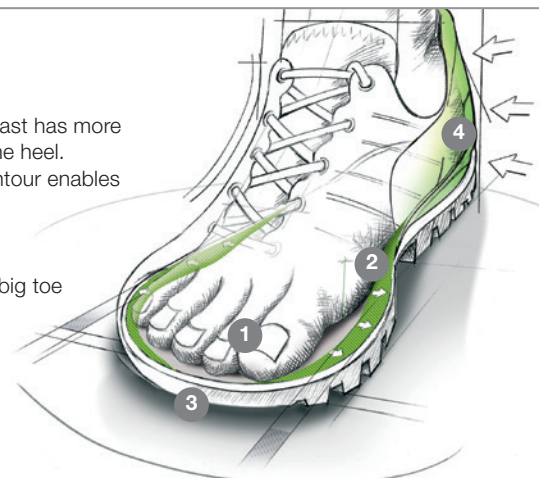

- (1) Cork insole with (2) Poron® shock absorber,
- (3) Cambrelle and fleece covering.
- (4) Plus integrated pad.

Comfort fit® concept

In comparison to a trekking last, our Comfort fit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe
- 3 Wider stance due to wider sole base
- 4 Perfect fit due to the snug-fitting heel.

Volume adjustment

Volume adjustment throughout, 4 mm thick. If more space is needed, the padding between the footbed and the inner sole can be taken out. The insole simultaneously works in the shoe as a shock absorber.

sportOmed

sportOmed
orthopedic

Using fine workmanship and soft materials, the styles in the SportOmed range by Meindl are based on the Comfort-fit® shoe concept where special care is taken to ensure that there are no seams at the front of the foot.

One special feature of the SportOmed shoes is the soft cushioning volume adjustment under the cork footbed, which allows for a high degree of individuality for adapting to orthopaedic insoles, but also offers the possibility of increasing the shoe's volume.

Travel - from city sightseeing to country hikes

For sightseeing, travelling or just walking to the shops. Our traveller's shoes look cool, are comfortable to wear, offer great cushioning and are yet at the same time so sturdy that they are suitable for the most diverse activities. The mounted assembly makes the shoes very stable and the distinct rubber grip sole gives you excellent hold on all kinds of surfaces. The range is rounded off by the wide choice of colours and lining materials, such as leather lining or GORE-TEX®.

Mounted Assembly

- 1 Foam padding for a perfect fit
- 2 Removable footbed
- 3 Nylon inner sole
- 4 Leather upper fastening
- 5 EVA/PU midsole
- 6 Non-slip rubber tread

For every adventure

Children want to play, romp around and have fun outdoors in every season of the year. Robust, flexible and multifunctional: our colourful styles are exactly what small explorers need for their adventures! Many of our models - from the light ankle boots to stable children's trekking models - are equipped with GORE-TEX®. So that the shoes and boots really fit, our children's styles are equipped with the proven Meindl Best-Fit system. The footbeds can be removed and are marked, which makes it easier for parents to quickly find the right size.

Children's shoes, seven important factors:

1. Removable Best-Fit footbed for a perfect fit.
2. Soft padded edges for comfortable yet secure hold.
3. Special children's last guarantees plenty of space for toes.
4. Grippy sole provides stability and security.
5. Reflectors increase visibility.
6. Impact protection withstands even the highest demands.
7. Heal cup for good foot positioning.

Best-Fit Footbed for Children

Ideally, a child's boot with a perfect fit will be around 12mm longer than the child's foot in the toe area. Our removable Best-Fit footbed allows a simple check to be made to assess whether the boots fits correctly. Children's feet grow up to 1.8 mm per month.

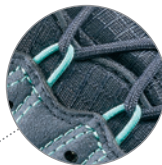

Innovation with GORE-TEX®

The styles in the Meindl Surround group are equipped with GORE-TEX® SURROUND® technology. This technology provides shoes that are breathable and permanently watertight all round. This unique construction ensures dry feet and thus a greater sense of wellbeing. The heart of the technology in styles X-SO 30 (Lady) GTX® and X-SO 70 (Lady) Mid GTX® is the special sole construction with a continuous spacer, which not only provides air circulation but also generates a very special cushioning effect.

Heelcuff-Freeflex

Pressure free lacing

A perfect all-rounder

The Trail Activity styles are ideal for sporty enterprises. All styles are equipped with well-cushioned and grippy soles and suit a wide range of leisure activities. The range has been expanded by more diversity in the fit. The colorful Model Caribe (Lady) GTX® is available in either normal and narrow versions for ladies. The emphasis is placed on the technical refinements in the construction of the upper and the sole. The grippy Meindl Multigriff® profile and the well cushioned EVA midsole make the shoes even more impressive.

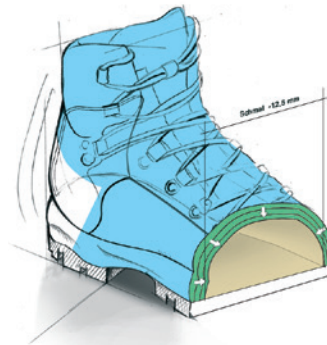

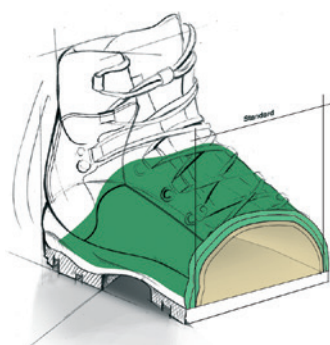

Notice:
The models Caribe GTX® and Caribe Lady GTX® are available in either normal and slim fit Version.

Fit System Concept

M Medium
Standard last: standard size corresponds to the width H

S Slim
12,5 mm narrower around the ball of the foot, corresponds to the width F

variofix® 3-SYSTEM

variofix®1 variofix®2 variofix®3

variofix® 3 System

A successful system has been further developed: The Variofix® lacing system provides a perfect fit – and has proven itself over many years and been continually improved. In the heel area, the Variofix® system that runs around the heel provides good heel positioning. When lacing up, the free-running „Speed Wire“ is pulled in closely and evenly around the heel. This guarantees better support.

Put them on and feel great

With our classic Walk & Travel boots and shoes, you've got the perfect accompaniment for every day. The comfortable leather shoes and boots are very soft and fit nicely. The soft cushioning and rubber grip sole are their most important features. Many styles in this range are fitted with GORE-TEX® lining.

Mounted Assembly

- 1 Foam padding for a perfect fit
- 2 Removable footbed
- 3 Nylon inner sole
- 4 Leather upper fastening
- 5 EVA/PU midsole
- 6 Non-slip rubber tread

MEINDL Sandals – also with Comfort fit®

Our sandals are functional. With a hook and loop fastener at the heel, each style can be adjusted to fit just right. And, additionally, all sandal styles are fitted with a rubber grip sole for an excellent hold. The styles with toe protection are also characterised by the removable and washable footbed.

Our Comfort fit® Sandals are new in the 2019 collection. The sandals are manufactured using the original Comfort fit® last and are equipped with the Comfort fit® Sport footbed. The wider sole base, which results in wider footing, complements these unique sandals. Once you put them on, we promise you'll enjoy the comfort.

Removable
Comfort fit® footbed

Comfort fit® concept

In comparison to a trekking last, our Comfort fit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe
- 3 Wider stance due to wider sole base
- 4 Perfect fit due to the snug-fitting heel.

The right socks for your shoes and boots

Socks are the closest things to your feet - especially when they're Meindl socks! They have been produced in such a way that they really complement a pair of Meindl shoes or boots. They are designed for various types of use and thus each provide individual benefits. We have individually tailored the system for children and teens, for women and men, for everyday use, for travel, sport and alpine use. Only a sock that really fits makes a boot or shoe perfect.

Meindl – A visionary in technology and innovation

Over the years, we have developed many technologies for the widest variety of uses . Our philosophy has always been to concentrate on the essential thing, which is the boot . Only in this way can we use our full range of skills for continuous improvements, new technologies and innovations . Meindl would like to supply all those people who enjoy walking in the mountains and outdoors: mountaineers, trekkers , low level walkers and families with children.
