

PRIMUS

OUR PHILOSOPHY

EFFICIENCY & LONGEVITY All our products are crafted to withstand all types of conditions, ensuring reliability for generations to come. Built with reparability in mind, spare parts are readily available, prolonging the lifespan of each item. We not only prioritize durability but also operational reliability, allowing for quick and efficient cooking while minimizing environmental impact. By conserving fuel and resources, Primus products aim to facilitate outdoor adventures with minimal ecological footprint, reflecting a commitment to sustainability and efficiency. projects via First Climate. Since last year we are also offsetting the emissions from our Powerfuel, making all our fuel carbon offset.

For our emissions 2022 we have supported a project in Istanbul, Turkey developing and constructing facilities converting landfill gases from two landfills into electric energy. The project is Gold Standard certified (GS ID 707).

INNOVATION TEST LAB At Primus' test lab, our dedicated team of engineers operates amidst an array of tools and equipment, creating an ideal environment for designing and testing prototypes under all types of conditions. Each product undergoes rigorous series of performance tests to ensure perfection before moving into production.

We make no compromises, and no details are left to chance. That's why each product must undergo inspection by three pairs of hands during assembly. As a final touch, our skilled assemblers ignite all stoves one final time before reaching your hands. These measures guarantee perfection and years of reliable use for many years of adventures.

MATERIAL We are dedicated to solid craftsmanship and small-scale production, prioritizing durability and sustainability over cost. Our products are crafted from carefully selected materials, ensuring longevity even in the harshest conditions. We opt for materials with extended lifespans, aiming to minimize our environmental footprint. When it comes time to retire a Primus stove, we ensure that its materials can be repurposed or recycled. Our aim is to design products that not only excel in performance but also contribute to a more sustainable future.

INNOVATED IN SWEDEN – Produced in Europe To ensure highest quality we keep our development in-house at our headquarters in Stockholm, Sweden. From design to thorough testing of prototypes until ready for production.

Since 1994, our Tartu factory in Estonia, strategically located near the Baltic, houses 30 skilled assemblers. This proximity ensures rigorous quality control and honors Europe's crafting heritage.

From initial concept to final production, each stage reflects precision and craftsmanship, setting Primus apart as a leader in outdoor cooking equipment.

EXPEDITION SERVICE For more than 130 years our products have been tested and trusted in the harshest of environments. We take great pride in ensuring all our products meet superior quality and that they will, with the proper maintenance, provide years and years of service. That is why we offer the Primus Expedition Service, applicable to any expedition stove (Ulti, OmniLite T1, OmniFuel and MultiFuel) sold from 2015 onwards. In the unlikely event the stove should fail due to defective materials or construction, we will help the original owner by sending spare parts, repair the stove or replace it – free of charge.

See www.primusequipment.com for a more extensive description and terms and conditions.

DESIGNED IN SWEDEN Step back in time to 1892, to a blacksmith workshop in the heart of Stockholm. Here, visionaries F. W. Lindqvist and J. V. Svenson invented the world's first soot-free kerosene stove. Being the first of its kind, they aptly named it Primus (meaning 'first').

The name became synonymous with reliable stoves, becoming the top choice for adventurers embarking on both initial ascents and demanding expeditions. From pioneering journeys to the South Pole with Roald Amundsen in 1911 to the iconic conquest of Mount Everest by Tenzing Norgay and Edmund Hillary in 1953, Primus stoves have etched their mark in history, fueling humanity's most extreme adventures, a legacy that lives on to this day!

OUR CHOICES

CORK Cork production is considered sustainable due to the fact that the cork tree is not cut down to obtain the material, only the bark is stripped – thus allowing the tree to continue to live and grow. Cork makes a great insulator as it offers a low level of thermal conductivity, while its resistance to moisture and liquid allow it to be used in a variety of environments.

BIO-BASED PLASTIC Materials such as starch, cellulose, wood, sugar and biomass are used as a substitute for fossil fuel to produce bioplastics. This makes the bioplastic production a more sustainable activity compared to conventional plastic production.

STAINLESS STEEL Stainless steel is an extremely durable material making it perfectly suited for outdoor pots, pans, bowls, plates, and glasses. The high resistance to rust together with its resistance to imparting flavors makes stainless steel products lifelong companions that are 100% recyclable.

ECO POLY-COTTON Leveraging upon the research and development completed by our friends at Fjällräven, we are excited to add their sustainable G-1000 ECO fabric into selected products. Built upon their classic G-1000 Original material, the G-1000 ECO is made from re-cycled polyester and organic cotton. G-1000 material is strong but light, ventilates but is resistant to water. By adding Greenland Wax, G-1000 becomes more water/drip resistant and is easy to clean.

FUEL EFFICIENCY Conventional camp stoves have an efficiency rate of 40% – more than half of the energy is wasted! In response, we designed the PrimeTech Stove System to achieve an efficiency rate close to 80 percent.

By combining three technologies: a built-in heat exchanger in the pot, an integrated windscreen that protects the flame, and a burner optimized for the PrimeTech Pot, we achieved nearly double the efficiency of a normal camp stove. Carry half fuel, produce half emissions.

CLIMATE NEUTRAL FUEL Primus gas has been CO2 neutral since 2015. Each year, we compensate for the carbon emissions from our gas and metal canisters by donating and supporting green initiative projects via First Climate. Since last year we are also offsetting the emissions from our Powerfuel, making all our fuel carbon offset.

For our emissions 2022 we have supported a project in Istanbul, Turkey developing and constructing facilities converting landfill gases from two landfills into electric energy. The project is Gold Standard certified (GS ID 707).

* STOVE GUIDE

CHOOSE STOVE BASED ON YOUR NEEDS Finding the right stove is much like cooking a meal. There are a few things to consider to succeed. Like how far you will travel and by what means, how many people you will cook for, and the weather conditions. We have listed the ultimate checklist to figure out which stove to choose.

WEATHER CONDITIONS Are you someone who ventures out in both summer and winter? Are your outings mostly on calm days, or do you need to be prepared for harsh winds and sub-zero temperatures? To ensure you're equipped for whatever conditions you encounter, we offer different kitchens tailored to these diverse needs, providing you with confidence and security in every situation.

WEIGHT TO CARRY Do you prefer to be as fast and free as the wind? Or at least feel like it. And only need to boil soups or make a quick cup of coffee? Then the obvious choice for you is a stove with minimum weight. But equally important is a clever design that is optimized for taking up minimal space. With hassle-free packing. Is this what you're looking and cooking for? Then our lightweight stoves got your back on the trails, and you won't even feel it.

COOKING AMBITIONS There's a difference between warming and cooking. Preparing a whole meal from scratch demands more tasks than putting something in the microwave. The same is true outdoors. So before you choose a stove it's important to set your ambition. Are there multiple cooking tasks to manage? What is the desired speed of preparation? What cookware and utensils are needed in the process?

NUMBER OF PEOPLE Are you bringing anyone along for your adventure? Maybe even a few? In that case, you should always bring an outdoor stove that allows you to feed all your hungry family members or friends at once. If you for example want to cook pasta for four people you need a stove that makes it possible both in terms of pot size and flexibility. Go big or go home. (If you want to keep everyone happy.)

NEWS 2025

PRIMUS DRINKWARE combines classic Swedish design with practical, high-quality features for every outdoor adventure. With heritage-inspired colors and top-tier functionality, Primus offers a dependable drinkware solution wherever your journey leads.

PRIMUS COOKING GEAR Primus cooking solutions go beyond just preparing meals outdoors—it's about making cooking effortless and enjoyable. The latest cookware and utensils make it easy to bring prepped ingredients, boil water over a fire or camp stove, and even scoop up the last bites from a meal bag.

STOVE UPDATES AND ADDITIONS We're always pushing to improve our equipment. Our product team is dedicated to innovation, constantly enhancing our stoves for even better performance. In 2025, the Micron Stove will be upgraded to be even lighter, while maintaining its compact design—making it the perfect choice for lightweight backpackers. Paired with the new 120g Trek Pot, it's an ideal companion for outdoor cooking.

Additionally, the Lite XL Stove System now offers new color options, providing backpackers and explorers with more choices to suit their style.

- Robust and durable with no folding parts, this stove is incredibly easy to use and can be passed down for generations
- Wide flame excels at heating larger pots to cook for 1-3 people
- Static 4-point pot supports offer extra stability and wind resistance while comfortably holding a variety of pot sizes
- Two lightweight anodized aluminum pots (2.3 L & 1.3L) nest together for easy packing while frying pan/pot lid with ceramic, non-stick coating works as a skillet or pot lid
- Pot gripper handles hot pots and pans with ease
- Comes with a nylon storage bag
- Gas NOT included

ESSENTIAL TRAIL KIT

ART. NO. P351150

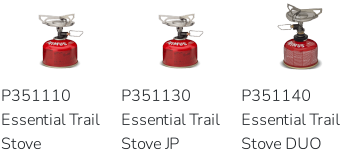

Compact all-in-one cooking kit for 1-2 people and everyday backpacking adventures.

- Compact, lightweight, easy to use and always ready to cook
- Wind-blocking pot supports keep the flame strong and steady in windy conditions while comfortably holding a variety of pot sizes
- Laminar Flow Burner Technology offers a lower center of gravity making the stove stable, lighter and more compact
- Our newest control valve allows for precise flame control
- Lightweight anodized aluminum pot (1 L) fits stove attached to the 230g canister for easy packing
- Frying pan/pot lid works as a skillet or keeps heat in while boiling water
- Two removable handles allow you to cook or transport this kit with ease
- Comes with a mesh storage bag
- Invented in Sweden, made in Europe
- Gas NOT included

ULTI STOVE SYSTEM 1.7

ART. NO. P380010

The ultimate cooking solution no matter the weather, altitude, or landscape.

- Catalytic combustion and infrared radiation burner has no blue flame to be extinguished
- Pressure regulator enhances efficiency and ensures consistent heat output
- Remote canister hose system allows the fuel canister to be flipped upside down for use in colder weather
- Disk burner with low center of gravity and sturdy legs can be used on a variety of ground cover and provides a stable cooking base
- Legs fold under and into the burner base to lock in hose and valve into a compact unit
- Fuel-efficient pot system securely sits on burner when in use and holds/protects a 100g (1.0L) or a 230g (1.7L) fuel canister and burner for easy packing
- Hard-anodized aluminum pot and lid with pour spout has integrated heat exchanger.
- Sturdy handle allows you to easily hold the pot and folds over the lid to lock the stove system together in an impact protected package
- Comes with a mesh storage bag for the burner
- Invented in Sweden and Primus Expedition Service certified

PREPARATION

CAMPFIRE CUTTING SET

ART. NO. P738006

A convenient camp knife and cutting board set that makes chopping, slicing, and filleting food in the outdoors a cinch.

- A high-quality, compact, portable and convenient cooking set that makes cutting, chopping and dicing food in the outdoors a breeze
- The 15cm stainless steel knife with an oak wood handle has a flexible blade suitable for chopping, slicing, and filleting
- Durable oak hardwood cutting board, perfect for preparing food with a smooth surface and a natural self-disinfectant effect
- PU-coated G1000 wrap serves as an additional space to prepare and place food on and is coated on the inside for easy cleaning
- Invented in Sweden

PREPARATION

CAMPFIRE PREP SET

ART. NO. P738007

The outdoor camp kitchen “mise en place”– everything in order and in one place.

- Includes a knife, grater, and wooden cooking spoons and utensils, conveniently rolled in a durable wrap
- 12cm stainless steel knife has a flexible blade suitable for chopping, slicing, and filleting Stainless steel grater doubles as a zester to take your outdoor culinary skills to new heights
- Traditional spoon, oversized fork and flat edged scraper fit all your cooking needs and are safe to use with nonstick pans
- PU-coated G1000 cover wrap serves as an additional space to prepare and place food on, includes a pocket for other small accessories, and is coated on the inside for easy cleaning
- Invented in Sweden

PREPARATION

CAMPFIRE KNIFE LARGE

ART. NO. P738009

Designed for the outdoors, the stainless steel blade and oak handle excel in the outdoors and offers excellent slicing, chopping and dicing.

- 15 cm blade in Stainless Steel
- The stainless steel has a flexible blade suitable for chopping, slicing, and filleting
- Durable oak handle offers a natural self-disinfectant effect
- Comes with a durable cover, making transport safe
- Available in 2 sizes

PREPARATION

OPENFIRE SPATULA

ART. NO. P738052

A stainless steel spatula with an extended handle that works in a variety of outdoor cooking situations.

- Made of food-grade 18/8 stainless steel that doesn't impart or retain flavor
- Sturdy yet flexible for great control while cooking
- Durable oak handle offers a natural self-disinfectant effect
- A perfect tool for Primus Openfire Pans or Kamoto Openfire Pit

PREPARATION

CRIMP POTGRIPPER

ART. NO. P740400

The sturdiness of a fixed handle with the flexibility of a traditional pot gripper.

- Locks safely to the pot making it both easier and safer to cook
- Can be combined with almost any pot
- With one simple push, it releases and can be used for other pots
- Invented in Sweden

PREPARATION

FIELDCHIEF KNIFE BLACK

ART. NO. P740410

Designed for the outdoor cooking, the stainless steel blade excels in the outdoors and offers excellent slicing, chopping and dicing.

- 12 cm long blade in stainless steel
- The stainless steel has a flexible blade suitable for chopping, slicing, and filleting
- Comfortable plastic handle
- Comes with a durable cover, making transport safe
- Available in 2 sizes

PREPARATION

FIELDCHIEF POCKET KNIFE BLACK

ART. NO. P740440

So many uses from prepping veggies to cutting rope, this jackknife is the perfect backpacking companion.

- Compact folding knife that is equally suited to cutting and chopping as to dicing and filleting
- 10cm long food-grade 18/8 stainless steel blade
- The folding design takes up very little space in a bag and makes travel safe
- The blade locks in open position and has a blade lock when folded
- Nylon carry case included that can be attached to your belt or backpack
- Can be used as a standard pocket-knife

Give your outdoor cooking some extra flavor with these durable salt and pepper mills.

- Set of 2 mills in 2 colors for quick reference
- Made of durable aluminum
- Easy to use with just one hand

PREPARATION

CAMPFIRE SERVING KIT

ART. NO. P740820

Prep, store, or transport food, or serve it to your crew on the four stainless steel plates which fits perfectly inside the bowl under the silicon lid.

- Made of food grade 18/8 stainless steel that doesn't impart or retain flavor
- Four plates conveniently nest together and can be stored within the bowl, and are secured with the silicon lid
- Thin construction makes for an elegant and lightweight bowl
- Use the large bowl for prepping, serving, or to store your leftovers by using the silicon lid
- Tapered shape is stackable for easier packing

PREPARATION

CAMPFIRE BOWL SMALL S.S.

ART. NO. P741550

A bowl in stainless steel, perfect for soup, stews or as a small prep bowl around camp.

- Made of food grade 18/8 stainless steel that doesn't impart or retain flavor
- Tapered shape is stackable for easier packing

PREPARATION

CAMPFIRE TONG

ART. NO. P741090

Large, lightweight and durable tongs for working around the campground fire, grill, or stove.

- Made of food-grade 18/8 stainless steel that doesn't impart or retain flavor
- Sturdy yet flexible for great control while cooking
- The cutout pattern ensures a great grip even when tongs are wet or greasy
- 10.8" (275mm) length is compact enough to bring on camping trips, while long enough to keep hands away from the flames
- Jagged and narrow tip for precise control

PREPARATION

TREK POT SET

ART. NO. P741420

These hard-anodized aluminum pots are lightweight, heat quickly and offer a durable finish that are corrosion-resistant. The Trek Pots are a perfect solution for backcountry meals. Available in two sizes or as a set.

- A set of one 1-litre and one 0.6-litre hard-anodized aluminum pots that conducts heat efficiently and effectively
- Ceramic nonstick-coating for easy cooking
- Spiral pattern on pot base ensures optimum heat transfer and adds additional grip on stove pot supports
- Frying pan in hard-anodized aluminum and nonstick-coating works both as a skillet or as lid for the 1-liter pot
- Lightweight plastic lid for the 0.6-liter pot comes with silicon handle and doubles as a strainer
- 3 adjustable and removable handles allow you to cook or transport pots with ease
- Comes with a mesh storage bag
- Nests together tightly for rattle-free packing
- Invented in Sweden
- Gas and stove NOT included

TREK POT UL 0.8L

ART. NO. P745250

Trek Pot UL 0.8 L – A minimalist and ultralight pot. This pot is made from hard-anodized aluminum and is 30% thinner than other models in the Trek Pot series, making it incredibly lightweight at just 120 grams. The lid features an integrated strainer and a practical pour spout. The silicone handle on the lid folds flat against the pot and provides a secure grip when pouring. The stainless steel handles are lightweight in design and rubber-coated for an excellent grip. When folded, the pot has a sleek, minimalist profile. It's the perfect companion to the Primus Micron Stove III and fits a 100-gram gas canister inside. A convenient nylon storage bag is included for easy transport.

- A minimalist and ultralight pot
- Hard-anodized aluminum pot conducts heat efficiently
- 30% more lightweight compared to other Trek pots
- Weighs only 120 grams
- Comes with a nylon storage bag
- Invented in Sweden
- Gas and stove NOT included

- Perfect set for the office, school, or your backpack
- Handles cut out to save weight
- Dishwasher safe

CAMPSITE

CAMP

COOLER

ART. NO. P740740

Perfect for smaller adventures when you want something cold stowed in a backpack.

- Keep food or beverages cold
- The roll-top opening makes it easy to seal the bag tight and doubles as a handle
- Outer nylon fabric is rugged and durable
- Buckle has an integrated bottle
- The 10L bag easily carries food for short adventures, while it's still small enough to conveniently be stowed away during transport
- PU-coated inside is easy-to-clean

CAMP

COOLER BACKPACK

ART. NO. P740750

The perfect companion to stay cool during any outdoor adventure.

- Insulated backpack for all your favorite camping food
- Roll-top system makes it easy to close and open, while a buckle (with a handy integrated bottle-opener) secures the content in the bag
- Outer nylon fabric is rugged and durable
- Small external pocket fits kitchen accessories or holds bottle caps
- The 22L pack easily carries food for multiple friends, and has space for 24 of longnecks or a couple of BIBs
- PU-coated inside is easy-to-clean
- EVA foam insulates the bag while providing padding for your back, making it comfortable to carry

CAMP

CAMPFIRE APRON

ART. NO. P740960

Protect your clothes from grease and soot while cooking at the campsite or in the backyard.

- Made from durable G-1000 fabric
- Two large front pockets keep any cooking accessories within reach
- Single small breast pocket for tasting spoons, pens, or a phone
- Adjustable webbing belt keeps the apron in place
- Stainless steel buckle doubles as a bottle opener

CAMP

BAG FOR ALIKA

ART. NO. P743020

Easily carry your kitchen to any basecamp. This Carry Bag transports an Alika Stove, fuel and any other small accessories you need to bring along.

- Made from water repellent and easy-to clean polyester
- Designed to easily carry or store the Alika Stove
- Holds the stove, gas and small accessories
- Hands free carry with an adjustable shoulder strap
- Buckle doubles as a bottle opener
- Invented in Sweden, made in Europe

FUEL

FUEL

ART. NO. P310020

Easily start a campfire anywhere and in any weather with this powerful blow torch.

- Easily start a campfire anywhere and in any weather with this powerful blow torch.
- High combustion rate makes for a more environmentally friendly fire lighting method
- Torch emits 7500 BTU
- Torch can be used upside down
- Can be used in extreme weather conditions
- Piezo ignition, no lighter required
- Works with all Primus Gas canisters, Gas NOT included
- Invented in Sweden

LABOGAS

ART. NO. P321201

GRAVITY MULTIFUEL KIT

ART. NO. P737380

Gravity Multifuel Kit transforms your gas stove to a multifuel stove. This kit is upgradesthe new Gravity EF to function with liquid fuel, including naphtha fuel and lead-free petrol, and, in case of emergencies, even kerosene. The kit contains has a 0.6-litre fuel bottle, ErgoPump, a multi-tool with a cleaning needle, fuel cup and jet nipples. A practical storage bag is included.

SPIDER MULTIFUEL KIT

ART. NO. P737500

This Multifuel Kit transforms your Spider Stove Set or Express Sprider Stove to a multifuel stove. This kit is compatible with newer Spider gas stoves purchased within the last year (from 2013). This upgrade gives you the option of using liquid fuel including, naphtha fuel and lead-free petrol, and, in case of emergencies, even kerosene. The kit contains a 0.35-litre fuel bottle, an ErgoPump, a multi-tool with a cleaning needle and jet nipples. A practical storage bag is included.

OMNILITE TI SILENCER

ART. NO. P737937

Attach this small accessory and listen to the undisturbed sounds of the wilderness, even while cooking! When using LP-gas or white gas, OmniLite Ti can be fitted with this silencer that transforms it into a silent stove. The silencer is not suitable when burning diesel, kerosene/paraffin or aviation fuel.

STOVEPAW

ART. NO. P721230

- Base plate for Primus stoves.
- Essential accessory for hose-mounted stoves when used on soft or uneven surfaces like snow, sand, or gravel.
- Increases the footprint of the stove, thus making it stand more stable and safe.
- Made of titanium, making the StovePaw Ti light and durable.
- Clip into special slots in the plate, attaching them securely.
- Fits Primus OmniFuel, MultiFuel, OmniLite Ti, EasyFuel, Express Spider, and some other stoves with three feet.

PIEZO IGNITER

ART. NO. P741460

Start a fire or light your stove in all weather conditions.

- Water-resistant and works in wet conditions – even rain and snow
- A spark with a simple click of a button
- Designed for use even when wearing gloves
- Invented in Sweden

CANISTER STAND

ART. NO. P741560

- Canister Stand
- Made from 94 % bio-based plastic and fiber glass blend, produced locally in Sweden
- Increases stability for stoves that screw directly onto the gas canister
- Compatible with all Primus gas canisters (along with most other brands)

WINDSCREEN AND HEAT REFLECTOR SET

ART. NO. P721720

- Windscreen and Heat Reflector Set increases heat output and shortens cooking time.
- Focuses heat on the pot and preheating coil.
- Fits Primus OmniFuel, MultiFuel, Gravity, VariFuel, EasyFuel, and ExpressSpider stoves.

SUSPENSION KIT FOR 3GRID STOVES

ART. NO. P721220

- Suspension Kit
- The wires hold the stove and LP gas cartridge or fuel bottle together
- Separated at the top to easily allow access for pots and pans.
- Fits all of Primus stoves with three pot supports
- Available in two versions for stoves with three or four legs.

SUSPENSION KIT FOR 4GRID STOVES

ART. NO. P733320

- Suspension Kit that holds the stove and LP gas cartridge or fuel bottle together
- Fits all of Primus stoves with three pot supports
- Available in two versions
